

Concerns about AI security? Don't know where to start?

Abu Bakar 
Former Chief Information and Digital Officer for Summit Medical Group and CityMD

This program is developed and funded by Microsoft & Exelegant and led by Abu Bakar, executive technology and business operations leader with multi-industry and global experience.

Engagement highlights

Accelerate your business impact and security for Copilot through technical readiness

Gain visibility into the users' interactions with data

AI/Copilot for M365 Readiness Program

Master control over your data and get ready to deploy Copilot in 60-90 days with a simple engagement process

- **Discovery** – Discovery session to create a baseline
- **Funding** – Gain potential funding through Microsoft and Exelegant funding programs
- **Control access to data** – Develop sensitivity labels for sharing and access restrictions
- **Classify, label, and discover** – Create automated & manual classifications and labelling of data
- **Apply encryption and access control** – Apply sensitivity labels and content marking
- **Prevent data leakage** – Identify, verify, and automatically protect sensitive data
- **Data lifecycle** – Reduce data exposure by managing the data retention
- **AI Adoption** – Prepare for Copilot for M365 deployment

Why participate

In the landscape of AI adoption and enablement, understanding how to effectively implement M365 Copilot while navigating the challenges of regulatory compliance, data quality, and security becomes paramount.

By participating in the engagement, you will:

Address data governance and data access

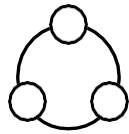

Ensure appropriate Data Security controls are in place

Prepare for Copilot for M365 deployment

Explore Microsoft Funding options for Copilot Adoption

What to expect:

- Receive Microsoft and Exelegant Investment Funding to explore and deploy AI in your environment.
- Uncover opportunities to implement data security measures and improve data security posture.
- Dynamically protect sensitive information and data quality
- Leverage Data Governance and Copilot's AI capabilities across various organizational functions
