

The Data Security Engagement

Identify data security risks in your organizational data

Partner-led engagement highlights

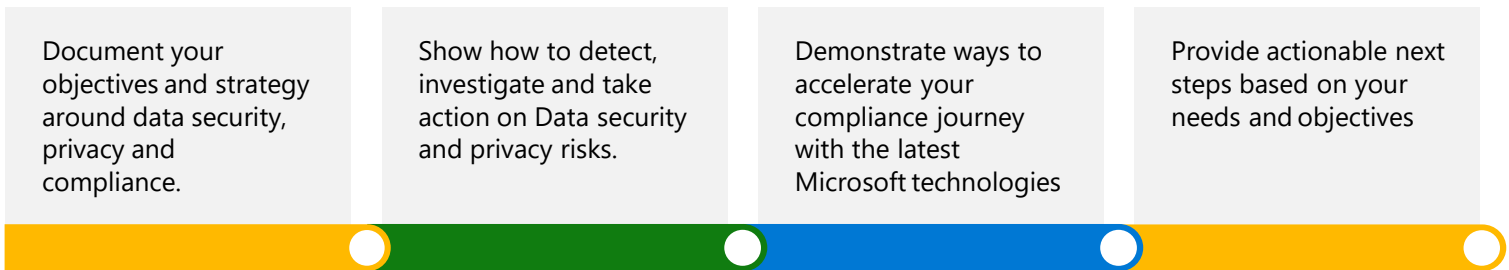

- Understand the risks of *Dark Organizational Data*
- Learn about the risks organizational insiders may impose
- Assess your environment against key data protection standards
- Receive an analysis and report on findings and associated risks
- Learn about tools and services that can help mitigate risks
- Explore recommendations and next steps

How the Data Security Engagement can help

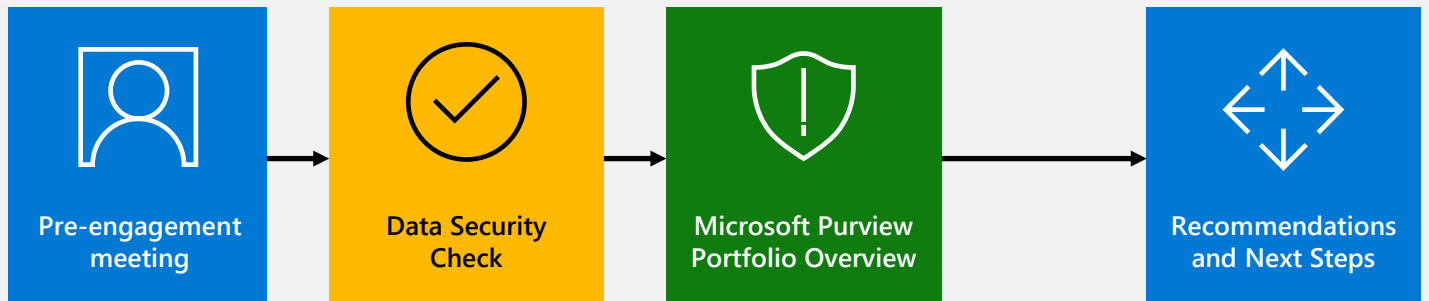

- ❖ **Understand the risks of *Dark Organizational Data***
Discuss and understand the hidden data security risks of dark data and how to mitigate.
- ❖ **Understand the risks organizational insiders may impose**
Learn how to identify and respond to insider actions and behaviors that can impose risks on the organization.
- ❖ **Assess the customer's Microsoft 365 environment**
Assess against a set of controls for key regulations and standards for data protection and general data governance.
- ❖ **Analyze and report**
Analyze the findings and associated data security risks. Provide insight and highlight those that are most impactful.
- ❖ **Learn about tools and services that can mitigate risks**
How can cloud services help and what does this mean for the end user.
- ❖ **Recommendations and next steps**
Provide recommendations for risk mitigation and define actionable next steps.

As your business-critical data expands and generative AI is being deployed rapidly, having an integrated approach that can help quickly identify, triage, and act on data security risks is more important than ever.

By participating in this engagement, our experts will work with you to:

Data Security Engagement

The Data Security Engagement

Identify data security risks in your organizational data

The Data Security Check uncovers risks that might be harmful to your organization

The Data Security Check is an integral part of the Data Security Engagement. The Data Security Check leverages Microsoft Purview tools and services in an automated process to:

- Discover data that is stored in the Microsoft 365 Cloud and analyze it for the presence of artifacts that may impose data security risks to the organization.
- Analyze user behavior for events that impose a risk to the customers organization. These vulnerabilities range from the loss of intellectual property to workplace harassment and more.

The Data Security Check is structured around typical Microsoft 365 services and their associated data repositories that organizations use. At its core, the Data Security Check analyzes user behavior and scans data repositories related to email, collaboration, and document storage.

Optional modules can be added to extend the Data Security Check to include on-premises data repositories, Windows 10/11 endpoints and more. All activities share a common framework that will allow you to understand the risks that exist in your organization and develop a roadmap to mitigate and protect your company's information.

How should participate

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)

Why Exelegant?

When it comes to security, you need an experienced partner. Exelegant is a cyber security and professional services company where efficiency is standard, and our customers are our partners. We have achieved a Security Solution Designation Area and Specialization in Threat Protection of Microsoft. Headquartered in Freehold, NJ with supporting offices in Newark, NJ, and L'viv Ukraine, Exelegant leverages years of experience to bring about a world-class experience for our clients.
