About Exelegant

- Market presence in 45+ countries
- 4 Global Offices with US East Coast HQ
- MPN: 2875555
- ECIF Supplier ID : Singularity Technologies Inc, 0003038159.
- PDM: Shamiana Soderberg @Microsoft

Our success is measured by your own

Bruce Lucarelli, CTO, DermOne

"Switching to Exelegant has been a major contributing factor to the growth of our group. As a company looking to expand, we really value our employees' time and productivity. Exelegant's IT Support has enabled our business to run as efficiently as possible."

Alexey Gololobov, CFO, Columbus Hospital

Exelegant has been with our hospital since we've opened our doors. Their experience in a wide range of projects and solutions, and management of vendors has made a tremendous impact on our efficiency

03.

Kevin Hannigan, President, Inflexion Point

Exelegant has become our trusted business partner and completed migration on time, alleviated hosting responsibilities, and gave us capabilities to enable team productivity and data security.«

Robert Florescu, CISO, CityMD

Exelegant helped our company migrate from G-Suite to Microsoft Office 365 with zero downtime and zero data loss. During the process, over 3,500 users continued to collaborate and run critical business functions seamlessly

BUILD. INTEGRATE. THRIVE.

Intelligent and **Quantified** Continuous and Automated **Cyber Risk Management**

Why the mannual prior auth process is problematic

Pursuant to N.J.A.C. 11:3-4, the New Jersey Department of Banking and Insurance, filling out an APTP form is a mandatory step for providers treating injured patients under PIP regulations. This is part of the **precertification process** where healthcare providers must submit detailed treatment plans to insurance carriers for approval. For New Jersey providers, requirements are strict. Failure to submit can result in substantial penalties, including reduced reimbursements. Claims without accurate prior authorization are being penalized and the provider is losing **50%-100% of the revenue**.

Fixing prior auth: 40-plus prior authorizations a week is way too many

What's the problem?

06.

On average, practices complete 45 prior authorization requests per physician per week.

35% of physicians have staff who work exclusively on prior authorizations.

88% of physicians describe the burden associated with prior authorization as "high" or "extremely high."

About 80% of physicians report that the number of prior authorizations required for prescription medications and medical services has risen over the last five years.

Prior authorization automation

07.

- **NO MORE** manual prior authorization submission!
- **NO MORE** missed or delayed requests.
- **NO MORE** incorrectly entered data due to manual error.

All you need is to create a medical note after visit with the recommended treatment. Our "creature" will do the rest

Empower your RCM with Exelegant's prior authorization automation, decrease costs and improve productivity of your RCM

08.

Lower cost care

Promote seamless collaboration between payers and providers to reduce expenses

Data-driven Healthcare

Revolutionize healthcare processes by transitioning from document reliance to adopting intelligent data-driven processes.

DESIRED OUTCOMES

Healthcare teams may expect immediate cost savings from 15 to 20% and in long term as much as 50% allowing the organization to boost productivity and grow in new powerful ways

Automate PA today

Use automated prior authorization to reduce amount of manual routine work, avoid mistakes and to expedite patient care

“Do More with Less”

Alleviate the burden of monotonous and time-consuming back-office functions that healthcare organizations face every day with Revenue Cycle Management knowledge & RPA technology behind.

It's time to empower your people to drive more business value!

1 RPA Pilot Solutions

Automation of time-consuming and repetitive tasks that are a daily routine of the RCM, back-office or front-office personnel

2 Processes Optimization

Fully-automated workflow for RCM, front-office or back-office with low-code robotization following industry compliance and secure cloud-based access management

3 RPA Business Processes Outsourcing

Leverage smart automation and Exelegant's RCM subject matter expertise to enhance the effectiveness of any RCM process

Who Benefits from Prior Authorization?

Physicians / Clinicians - Faster treatment decisions, reduced administrative work

Admin / Front Desk Staff - Streamlined workflows, fewer manual errors

Billing / RCM Teams - Higher approval rates, faster reimbursement

Healthcare Administrators - Improved efficiency, cost and time savings

Patients (indirect) - Quicker access to care, improved satisfaction

How does the automated process look like?

Analysis

Our tool is checking the list of patients' visits and analysing their insurance plans, doctor's prescriptions and care plan

Automated filling in APTP form

Based on the previous analysis and requirements, the filled in APTP form is being created

Attaching medical records

Extracting and attaching medical records to the APTP that support medical necessity (office notes, MRI, script, etc.) based on regulations

Reporting

Daily all visits are being analysed, APTP created with attached medical records and ready to submit. Provider will receive the detailed report with checked, skipped and created PAs ready and to follow up

Quality control

Our highly qualified prior authorization professional is monitoring and verifying the automated process to make sure it meets all requirements and provider's requests (optional)

Submitting APTP to payers

Ready prior authorization requests are being sent to the appropriate payers (with proof of submission)

RPA – Prior Authorization Automation Use Case

Goals and expectations

The healthcare organization aims to streamline and optimize the process for obtaining insurance approvals. By automating the extraction of patient data and form submission, the solution aims to reduce the time and manual effort involved, improving overall efficiency.

Automation assisted with ...

- Retrieval of all relevant patient data, including visit history, doctor notes, and prescriptions, from the healthcare provider's EMR system.
- Automatically mapping the information to the correct fields in the insurance authorization form.
- Cross-checks the accuracy of the data before submission to ensure compliance with insurance carrier requirements.
- Submission the prior authorization request to the appropriate insurance carrier and tracks the status for follow-ups or re-submissions if required.

Company Profile

Location: New Jersey

Industry: Healthcare

Stakeholders: RCM

Providers: 6+

Implementation Summary

Time savings

The process of manually filling and submitting prior authorization forms, which previously took up to 12 hours per patient case, has been reduced to 25 minutes using the automated solution.

Error reduction

Automation has led to a significant decrease in data entry errors, ensuring that over 95% of forms are submitted with complete and correct information, compared to a prior 15% error rate in manual submissions.

Improved compliance

Ensures compliance with both healthcare regulations and insurance carrier policies by adhering to required formats and verifying data before submission.

Scalability

The solution is designed to handle up to 10x the volume of prior authorization requests without requiring additional human resources.

Faster approval cycles

Reduction of labor costs

14 .

KPIs for prior authorization include:

Automated system completes PAs in **less than 1 hour**

PA Submission Time: The time it takes to initiate a PA request to submit it to the payer. **24 hours**

Approval/Denial Rate: The percentage of PAs approved on the first submission or denied. **72%**

Turnaround Time: The total time elapsed from submitting a PA request to receiving a decision from the payer. **72 hours**

Appeal Rate: The percentage of PAs that require an appeal after an initial denial. **20%**

Internal Rejection Rate: The rate at which PAs are rejected internally before being submitted to the payer, indicating potential issues with the request process. **0.05%**

Utilization Review expert Productivity: An indicator of both individual and team productivity is the quantity of PAs an expert processes in a particular time frame.
