

# First Analytical Model

## A cloud-based analytical model in 15 days

For companies who already have a business intelligence platform and would like to explore the additional benefits that analytical tools could bring them, our First Analytical Model (FAM) offer is the solution. FAM is a comprehensive service that includes the implementation of an analytical model and personalized dashboard comprising three key performance indicators and three underlying detail reports.

### DESCRIPTION OF OFFER

Our First Analytical Models (FAM) solution includes the development of a personalized analytical model based on client data, enabling the optimization of a business process. The findings of this analysis are presented in a dashboard that contains the results of the model, plus up to three key performance indicators and underlying detail reports, giving access to the detailed data of which they are comprised.

The dashboard, reports and data are securely hosted in the cloud and accessible from anywhere via the Power BI tool.

With its propriety methodology, EXIA can deliver your First Analytical Models project in just 15 days.

### INCLUDED IN OFFER

- + 1 personalized analytical model
- + 1 dashboard comprising 3 performance indicators and 3 underlying detail reports
- + 5 Power BI user licences valid for 1 year
- + Up to 250 GB of storage in an SQL Azure database for 1 year
- + 12 monthly data refreshes
- + 1 knowledge transfer/training session for users

### CONDITIONS

- + 1 data source collected from a SME project or 1 data source approved by EXIA
- + For SMEs only
- + The client commits to making key contacts available to EXIA throughout the duration of the mandate
- + EXIA remains the Digital Partner of Record (DPOR) for licences used under this offer
- + The mandate must be completed within 15 consecutive business days
