# Migrate to Microsoft Azure IoT

Microsoft  
Partner  

 **Microsoft**  
Cloud Solutions Provider (CSP)

## Assessment > Migrate to Microsoft Azure IoT

EXIT83 partners with customers to evaluate Microsoft Azure IoT capabilities and design a comprehensive plan for migration to Azure IoT - including connectivity & data, devices, and multi-cloud environment support - with the goal of having a more sustainable solution in place on a platform customers can trust.

Assess business needs & identify specific cases supported by migrated solution.

Define migration roadmap for minimal service disruption

Create/ complete basic configuration of an Azure Tenant

Manage cost with flexible staffing – fully managed execution or staff extension.

EXIT83 has Azure technology experts on staff, with specific IoT solution development experience to manage your migration. 60 highly specialized employees across 12 Americas countries and Europe means we can support you with a team in or near your time zone, with a lower total cost of delivery.

## Innovate for tomorrow with EXIT83

**60 highly specialized employees across 12 Americas countries** means a team located in/near your time zone, and a lower total cost of delivery.

IoT development

Smart HVAC system

### A team of experts you can trust

- › **Business-outcomes driven.** We do deep discovery and challenge assumptions to deliver solutions that solve business problems.
- › **Scalable engagement model.** We address the needs of any size customer – startup to enterprise – with our scalable engagement model.
- › **30+ years in the Microsoft ecosystem.** Founded by former Microsoft leaders, we brings decades of Microsoft ecosystem expertise.
- › **Remove barriers to innovation & growth.** We can manage your projects or seamlessly extend your in-house teams with near shore cost-effective engineers.

*"EXIT83 has been an incredible partner to work with on our consumer platform, Protect. Starting only with wireframes, their hybrid team of engineers from North and South America developed the back-end architecture and front-end user experience to the delight of our customers."* ~Matt Angorn, GM at Axon
