## **EIS ITC Intune Setup**

### **Overview:**

The Intune setup project focuses on seamlessly integrating Microsoft Intune into your organization's operations. Under the guidance of an experienced Microsoft certified technician, this four-week endeavor enhances device and application management efficiency.

### **Goals:**

- Seamlessly incorporate Microsoft Intune for streamlined management.
- Optimize device and application management processes.
- Strengthen data security and compliance measures.

### **Key Phases:**

1. Preparation (Week 1): Assess Azure AD readiness, outline integration requirements, and secure necessary licenses.
2. Configuration (Week 2): Establish policies, select optimal enrollment methods, and prepare for seamless integration.
3. Application Deployment (Week 3): Strategically deploy applications, ensuring a smooth user experience.
4. Testing and Refinement (Week 4): Rigorously test policies, security measures, and application deployments. Refine strategies based on practical outcomes.

### **Benefits:**

- Enhanced device and application management efficiency.
- Strengthened data security and compliance protocols.
- Improved organizational productivity and streamlined workflows.

### **Timeline:**

Four weeks, starting with a Kickoff meeting and concluding with a wrap up meeting.
