

Transforming Business Communication

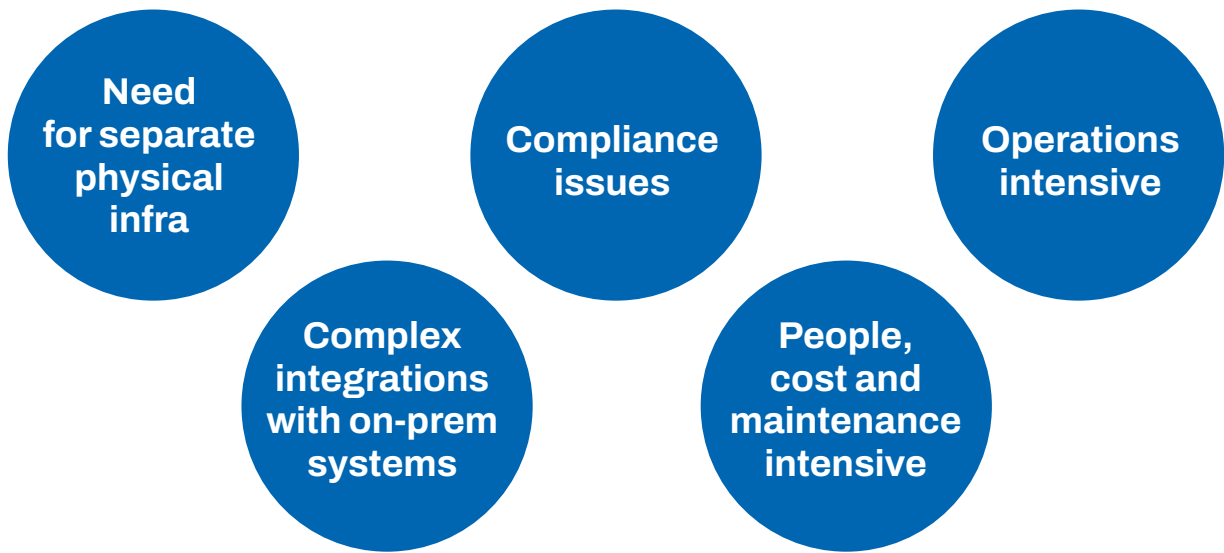

Connect with internal and external stakeholders in an easy, safe and cost effective way

Many Indian businesses utilize Microsoft Teams daily, but struggle to enable PSTN calls due to the complex regulatory environment and a dearth of true cloud-based solutions. This necessitates costly and resource-intensive separate telephony infrastructure, which is far from ideal.

Why is a telephony integration needed on Microsoft Teams?

- ✕ **Boosts employee productivity with 1-click calling**
Engage with external stakeholders on Microsoft Teams without switching devices or applications, all with 1-click
- ✕ **All communication data is stored in one place**
Aids in data management and analytics
- ✕ **Compliant and secure business communication**
Peace of mind with encrypted connectivity securing conversations

But, it's difficult to integrate PSTN into Microsoft Teams in India because

Experience Freedom and Agility on Microsoft Teams

Break the shackles with Exotel's True Cloud

- Flexibility**
 Easily add Direct Inward Dialing (DIDs) and channels for your Microsoft Teams users, catering to unique business needs
- Cost Efficiency**
 With zero- infrastructure dependency, our cloud-native solution results in significant cost savings and no operational overheads
- Robust Security**
 With encrypted connectivity, built-in resilience, redundancy, and 24/7 support, your business communications are always in safe hands
- Compliance Assurance**
 Exotel is a licensed Virtual Network Operator in India with Microsoft- certified & tested infrastructure to keep your conversations fully compliant

Why Exotel

Only Voice Cloud player with Virtual Network operator license in India

High Reliability with **99.95** uptime.
