"Organizations that implement intelligent document processing reduce document handling time by up to 70% and cut costs by 50%."
— Deloitte Insights

# Intelligent Document Processing (IDP)

## Turn Document Chaos into Intelligent, Scalable Workflows

Documents are everywhere—invoices, contracts, reports, forms, emails. But most of them remain trapped in manual, fragmented processes, slowing down operations, increasing costs, and introducing errors.

Our Intelligent Document Processing (IDP) offering helps you turn document-heavy processes into intelligent, automated workflows using AI, OCR, and Generative AI—so your teams can focus on decisions, not data entry.

# Why Traditional Document Handling Is Holding Businesses Back

## From Bottlenecks to Intelligent Document Workflows

Manual document handling is slow, error-prone, and costly. Traditional OCR and data entry methods can't keep up with the volume, complexity, and compliance demands of today's business environment.

| Current Challenges | Opportunities with IPA |
| --- | --- |
| High manual workload and processing dela | Automate document workflows from intake to output |
| Human errors and inconsistent data | Improve accuracy with AI-powered data extraction |
| Unstructured data trapped in files | Unified orchestration across systems, APIs, and agents |
| Manual exceptions & slow escalations | Convert documents into structured, usable business data |
| Difficult file search and retrieval | Intelligent classification and metadata tagging |
| Time-consuming document review | Summarize content instantly using Generative AI |

AI-Powered Document Automation (AIDA)

# Intelligent Document Processing (IDP)

## AI-Powered Document Automation, End-to-End

Our IDP solution is designed to help you automate every step of your document lifecycle—from data extraction and classification to creation, summarization and system integration.

The result? Faster decisions, lower costs, and smarter operations.

| IPA Offering Highlights | Purpose |
|---|---|
| **Document Automation Readiness Assessment (Free)** | Identify pain points, volumes, and automation ROI potential |
| **Workflow Design & Use Case Prioritization (4 Weeks)** | Tailor document automation flows aligned to your business goals |
| **AI-Powered OCR & Data Extraction** | Extract data from PDFs, scans, forms, images, and handwriting |
| **Document Classification & Metadata Tagging** | Auto-sort documents and apply smart metadata for quick access |
| **Generative AI for Document Summarization** | Get key insights from lengthy documents in seconds |
| **System Integration with Business Applications** | Seamlessly connect to ERP, CRM, HR, and compliance systems |

AI Workforce for Smarter Business Operations

# Business Outcomes & ROI That Matter

**IDP drives more than speed—it delivers accuracy, visibility, and compliance at scale.**

IDP cuts document processing time by up to 70%, reduces manual effort and errors, and boosts data accuracy and traceability. With AI-driven insights, decisions happen faster, and audit-ready workflows strengthen compliance.

For example, automating invoice processing can slash turnaround time, cut costs by up to 50%, and free teams for higher-value tasks—delivering faster ROI across operations.
