## Employee Experience with Microsoft Viva

### ABOUT Experts Inside AG:

Since we are founded in 2011, we are focused on location- and device-independent work, anytime and anywhere with Microsoft 365 technologies. Over the years, we have built up specific know-how in the cloud based modern workplace, communication and collaboration as well as cloud adoption and change, which we are happy to share with our valued customers.

#### See what customers are saying:

*"The access to company information, knowledge and learning artifacts for all our employees, integrated in their own daily workflow, brought adoption and engagement to a next level!"*

- Tech Industry, Head of HR

### WHAT WE OFFER

- Learn more about employee-experience! With our accelerator workshop you will find out how Microsoft Viva can support you to reach the next level of modern work.
- Within our workshops, we take user adoption and engagement to new levels by providing information where people need it - in their daily workflow.
- Create a hybrid work experience for your employees that balances productivity and well-being
- We support you to experience a modern intranet with news, company information, official documents, communities and more - all integrated into Microsoft Teams
- We will help you to understand why continuous learning in small increments, integrated in the daily workflow, is critical for employees in a complex environment

# Why Microsoft Viva?

## Create a new level of employee experience

Innovative and agile environments and the shift to hybrid working scenarios require new instruments to provide best employee experience. Ensure access to information and knowledge, foster the development of employees and teams and help all participants to do their job best they can. That is for what the Microsoft Viva modules stand for.

## Drive user adoption and engagement

Whether in the office or on the road, employees spend too much time trying to find information they need to do their jobs. On the one hand, news, instructions, templates or regulations. On the other hand, learning artifacts suitable for the role and daily tasks of the employees. Viva Connections and Learning offer the easy access to information and foster continuous collaborative development directly in Microsoft Teams – the companies' digital workplace.

## Experience next generation knowledge management

The new generation of knowledge management identifies valuable topics based on artificial intelligence (AI) out of the employees' daily work. And even more – the decade of searching is finally over! With topic cards, Viva Topics brings the knowledge directly in the users' daily workflow within Microsoft Office, Teams and SharePoint. The knowledge is there, where users need it – fully integrated in their digital workplace tools.

## Bring productivity and wellbeing into balance

Working in a dynamic environment and remote and hybrid offices faces us with many challenges. Digital leaders and employees – both are faced with new challenges. At the end, the balancing of productivity and wellbeing is key for long term engagement and health. With targeted tips for their daily work, Viva Insights helps all employees making their working day more enjoyable and more productive.

The Microsoft Viva Employee Experience suite is part of Microsoft 365 cloud-based subscription service that brings together the best tools for the way people work today.

### Key use cases

#### Company portal in Teams

Share your company portal as Teams app and ensure easy access anytime, anywhere and on any device within Microsoft Teams and Viva Connections. An additional big plus for frontline workers!

#### Easy access to knowhow and learning artifacts

The access to knowledge and learning artifacts within the own workflow is a key success factor. Viva Topics and Viva Learning make knowledge and learning available there where employees need it!

#### Targeted tips for wellbeing and productivity

Mostly employees are so focused on their tasks that they do not think about workflow improvement on one side, their own wellbeing on the other side. With targeted tips, users are supported in starting and ending their working day, they are reminded doing breaks and they get concrete actions how they can improve their productivity.
