

Chargeback for Microsoft M365 Licenses

In today's dynamic business environments, managing software licenses can be fraught with inefficiencies and compliance risks. The complexity increases with organizational growth, diverse operational needs, and evolving technology landscapes.

- ❑ **Complexity in Management:** Managing licenses across multiple departments or countries is often chaotic and time-consuming, leading to mismanagement and inefficiencies.
- ❑ **Lack of Transparency:** Without clear visibility into license allocation and usage, organizations face potential overspending and difficulties in strategic budgeting.
- ❑ **Compliance Risks:** Decentralized and untracked purchases, known as Shadow IT, can lead to compliance breaches and security vulnerabilities.
- ❑ **Inflexibility in Scalability:** Traditional licensing systems often fail to adapt quickly to business scaling, mergers, or strategic pivots, causing delays and extra costs.

EZAIX Microsoft M365 License Chargeback streamlines the intricate processes of **tracking, allocating, and billing license costs across departments, or country-based operations**. By automating these processes, our solution not only reduces administrative overhead but also improves accuracy in financial allocations and compliance, ensuring that every license expense is transparent and justified.

- ✓ **Enhanced Financial Oversight:** Automated bill-back processes ensure that departments are billed accurately for their actual license usage, promoting budgetary adherence and eliminating wasteful expenditures.
- ✓ **Optimized License Utilization:** The platform analyzes usage patterns to recommend optimal license allocations, preventing under-utilization or costly over-provisioning.
- ✓ **Seamless Scalability:** Whether you are managing a few dozen or several thousand licenses, EZAIX License Chargeback scales effortlessly to meet your needs, making it ideal for growing companies.
