

# Accelerate learning with serious play

## About Kunjani

Kunjani is a learning and development app to upskill, onboard and engage remote teams. The gamified environment creates a buzz, utilising the fact that everyone likes to play and is soon drawn into the fun, collaborative spirit of the serious-game. There are points, time limits and interesting activities to fuel the fun! Kunjani is a unique and essential tool for professionals hosting meetings in any field.

## What we offer

Kunjani meetings are specifically designed to engage participants using their preferred way of giving and receiving information.

Combining the structure of a game, sound learning methodologies and Teams meetings.

Kunjani activities complement and enhance existing Teams meeting features like: chat, whiteboard, breakout rooms and presentations.

Before a meeting, you can create your own Kunjani deck on a topic of your choice using activity prompts to guide you. Alternatively you can access the public library to search for a pre-developed deck to customise according to your needs. In a Team channel you can preview and edit each other's contributions in real-time. Use the chat to discuss. Get creative!

## What our customers are saying

"Using a dynamic Kunjani intervention of story and gamification, our delivery drivers are better equipped to be safe, seen and secure on the roads"

Clint Ducie, Group Training Manager,
