**faradai** / **NET-ZERO INTELLIGENCE**

GHG Mastery For Net Zero Success

Comprehensive Carbon Accounting Software for busy sustainability teams.

Ensure **accurate calculations** - Spend **less time reporting** and more time decarbonising

✓ **Comprehensive Emissions Factory Library**

✓ **Accurate & Instant Calculations**

✓ **Audit Ready Reports At Your Fingertips**

✓ **AI Powered Hotspot Analysis**

Reduce the risk of errors, create a single source of truth and automate your carbon footprint reporting

Trusted by:

GHG Mastery For Net Zero Success

Comprehensive Emissions Tracking

Streamline 2000+ sustainability metrics across energy, waste, travel, and supply chain, tracking all GHG emissions (CO_2, CH_4, N_2O, HFCs, PFCs, SF_6, NF_3) in one platform.

Accurate & Instant Emissions Calculations

Leverage our emissions-factor library, powered by IPCC, DEFRA and more, for precise instant calculations. Our libraries are kept up to date to ensure you have access to the latest emission factors, saving you time.

Seamless Integration & Automation

Our cloud gateway & integrations streamline system communication, automate data collection, and enhance accuracy.

AI Insights for Emissions Reduction

Use AI to analyse site performance and focus efforts where most impactful.

Simplified Reporting & Compliance

Our platform automates your carbon footprinting reporting saving you time and keeping you compliant.
