

IP Geolocation API - City, Country, Time Zone & Maps

FASTAH™ IP INFORMATION FOR DEVELOPERS ON AZURE

Internet Protocol (IP) information APIs from Fastah allows quick integration, and single billing through your Azure monthly invoice. Fastah datasets are updated weekly and rely heavily on first-party data, hence the quality is assured. Fastah IP intelligence is well proven on major global cloud providers, and enterprise references are available on request.

What customers are saying about Fastah

"This API service satisfies our [geolocation] use case very well. And the performance is good. The data error rates are very low.

Great work! Customer Support response time is very low too."

– Senior Engineer, Autodesk Inc.

WHAT THE HOSTED API OFFERS

Locate your users with this high-performance API that requires just the Internet Protocol (IP) address as input. Use it for geo-targeting, displaying country or city-specific pages, spam avoidance, analytics, time-zone related scheduling, and data visualization.

- Serve city and country optimized content to your visitors.
- Avoid spam and bots.
- Do smarter product analytics.
- Strong coverage of mobile internet IPs including modern IPv6 carriers
- IP datasets refreshed weekly. Low-latency REST API with caching

The Fastah™ IP Geolocation API is seamlessly integrated with Microsoft Azure, including consolidated billing and standard terms.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
