Why Instant Search + Merchandising for Dynamics 365 Commerce Merchants?

- **Search Merchandising**
Promote specific products per specific keyword search
- **Collection Merchandising**
Arrange an entire collection product placement
- **Rule-Based Merchandising**
Promote entire collections over others
- **Upsell & Cross-Sell Merchandising**
Set specific rules for products upsell & cross-sell recommendations

Retail Merchandising (Search, Product, Collection)

Get instant control per product or search query over how your products are placed and presented to shoppers. Whether a new arrival, seasonal promotion, new collection or different geo location – you are in control of what the shoppers see.

InstantSearch+ automatically blends visual and rule based product promotions. Be it through search or collection viewing.

Rule Based Merchandising

Set merchandising rules to automate and scale your collection.

InstantSearch+ merchandising automation can be:

- **Attribute Based** – promote/ demote per certain product attributes.
- **Sales Velocity** – change product position per its sales performance.
- **Inventory Depletion** – place a product based on its inventory.
- **Category Based** – promote certain categories over others.
- **Grouping** - group together products with similar colors, types, design, etc.
- **Catalogue variety** - show your catalog's variety by presenting products with different colors, brands, designs, materials.
