# Application Modernization and Web Enabling by fecher

We use tool-based services to migrate your existing legacy applications to modern platforms – fixed price and fast

*fecher is a consulting and software company with a 30-year track record. We specialize in turn-key legacy migrations for business-critical line of business applications and databases. As an early member of Microsoft Azure Inner Circle, fecher focuses on migrating Client/Server applications to platforms such as Microsoft Azure and SQL Database - for a fixed price and by a reliable short schedule. For these projects, fecher applies a proven process model, effective tools and the know-how it has acquired from more than 500 successful migration projects.*

**Fit for the Cloud**

*Users want cloud-accessible mobile apps and browser apps - this is one of today's key factors driving application modernization. With fecher's Web Enabling, your existing business applications will become fit for the cloud and Software as a Service.*
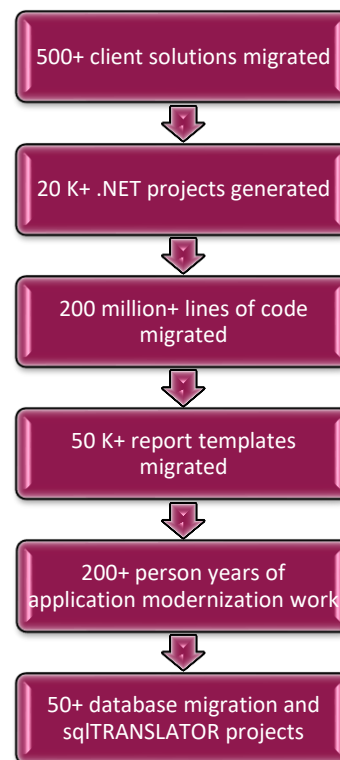

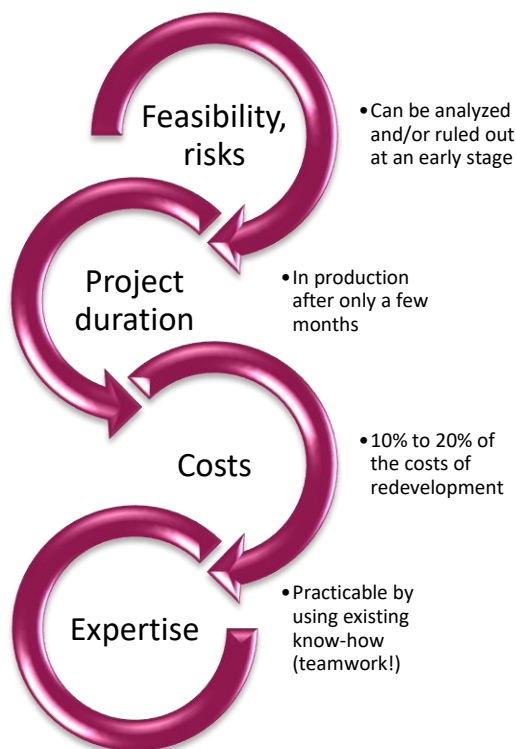

| from\to | WinForm Client-Server | ASP.NET HTML5 | Azure, mobile | Programming language C# | Programming language VB.NET |
|---|---|---|---|---|---|
| **Gupta/SqlWindows** | X | X | X | X | X |
| **VB6** | X | X | X | X | X |
| **.NET WinForm** | | X | X | retained | retained |
| **Access (front end)** | X | X | X | X | X |
| **ASP.NET** | | | X | retained | retained |

- Databases are migrated to SQL Server or SQL database, database middle tier for SQL translation
- Report templates are migrated to Reporting Services, Crystal Reports, List & Label, Stimulsoft
- Training, coaching and workshops (Rich Internet Applications, Azure) as well as architecture consulting
- Flexible process-model-variants range from do-it-yourself to all-inclusive
- A free analysis that includes an extensive presentation of the costs, the project duration and the course of action
- Microsoft Azure is the core of every application modernization project
- Infrastructure as a Service (IaaS) for internal use in your development department and for hybrid cloud scenarios
- Software as a Service with PaaS and IaaS as a delivery and licensing model

### *Proven process model*

All of fecher's projects are carried out in several phases using a proven process model with various levels of service: During the evaluation phase, in collaboration with its potential clients, fecher develops a solid decision-making basis for migrating the application. This phase also includes a fixed-priced offer keyed to the quantity and complexity of the code. Only thereafter does the actual project begin with the implementation phase. In the final phase, extensive tests are run to ensure the ported application is fully executable in the defined local, cloud, web and/or mobile environments.

### *Benefits of application modernization with fecher*

**Feasibility, risks**
- Can be analyzed and/or ruled out at an early stage

**Project duration**
- In production after only a few months

**Costs**
- 10% to 20% of the costs of redevelopment

**Expertise**
- Practicable by using existing know-how (teamwork!)

- 500+ client solutions migrated
- 20 K+ .NET projects generated
- 200 million+ lines of code migrated
- 50 K+ report templates migrated
- 200+ person years of application modernization work
- 50+ database migration and sqlTRANSLATOR projects
