

Managed Services for Azure

Take the safe and simple fast track to Microsoft Azure with Fellowmind's Managed Services

Fast track your journey to Azure

We provide you with what is needed to establish a robust, mature, and scalable Microsoft Azure platform including governance and security – with minimal effort and requirement of skills.

Our Managed Services for Azure is based on our SaaS solution and delivered as a Managed Service in your tenant. We support and operate the solution.

Your sole focus is to deploy cloud services and solutions to enable digitalization based on Azure.

Everything you need to get the best from Azure:

- Our dedicated team will get you ready to deploy services in 2 weeks.
- Portal based service requests and automated creation of Landing Zones and services.
- Code based solution, with quality, support, and continuous development.
- Based on Enterprise-Scale, refined by Fellowmind from +100 implementations, to create a robust multi-region platform.
- The scalability you need to provide your teams with the freedom to develop, migrate and deploy services and workloads in Landing Zones.
- Integrated documentation and service catalogue with automated standard requests.

Extend the use of the Azure with Managed Services

- The Azure Platform services constitutes a robust, safe, secure, and scalable Azure solution ready to request deployment of landing zones, servers, services, or entire blueprints to get you going in minutes.
- Landing Zones services provide a fast blueprint based-, well-defined- and governed room, to provide your Azure developer or deployment teams with safe and scalable access to Azure services.
- Azure Kubernetes Services (AKS) services provide a ready to use container platform where you can deploy new, modernized, or migrated solutions.
- Azure Virtual Desktop (AVD) services provide access to a secure and scalable remote desktop experience from virtually anywhere.

Powered by Azure, maintained and supported by Fellowmind – as an enterprise ready alternative to open source and DIY solutions.

What our customers are saying

“We have been really satisfied with Fellowmind and their assistance in both advising on and the technical implementation of our Cloud first journey and establishing the Azure platform.”

Christofer af Ekenstam

Business value

Gain benefit on all values of your organization with our Managed Services for Azure.

From a CIO perspective

- A standardized delivery which is easy to understand, use and operate.
- Use of Service Catalogs – enables self-service to individuals, teams or project manager.
- Fewer critical or high impact cases and shorter time to recovery.
- Focus usage of skills and knowledge on business applications.
- Avoid the dependency on specific people.

From a Cloud Center of Excellence perspective

- Easy to deploy a set of services and servers.
- Integrated into the pipeline developers already use.
- Better security utilizing governance and compliance controls.
- Enables the transformation to native cloud and services.
- Better control over budgets.
- Integration into the DevOps process.

From an operations perspective

- Automation saves time and provides consistent quality.
- Automated version control, tracking and change management.
- Automates recovery and deployment.
- Free up time - leaving more time for innovation and improvements.
- Scalability.
- No vendor lock-in.

High level process

Fellowmind has through numerous projects developed a model to ensure successful onboarding of managed services.

Engage

Align expectations to agree on terms and conditions.

Discover

Ensure prerequisites are in place on both sides.

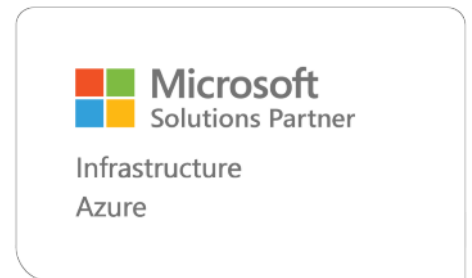

Implement

Deploy and configure platform modules and services.

Utilize

Enter hyper care and initiate workload onboarding.

Pricing

Contact us for pricing examples suited for your industry and segment.

Fellowwind

As one of Europe's leading Microsoft partners, we guide businesses to digital readiness with in-depth industry knowledge and scalable Microsoft Cloud solutions.
