**Validation manager™**

**Solution for Clinical Laboratories**

# Conduct lean verifications

*Put time back into your day by taking spreadsheets out of the equation.*

Validation Manager empowers your laboratory to:

- Verify new instruments and assays 6 times faster.

- Easily validate in-house test performance.

- Significantly reduce the time spent on routine quality work.

- Examine your method's performance more thoroughly.

## Complete your verifications/validations in days, not weeks.

Validation Manager software service enables your lab to automate verifications and validations, so you can:

- Complete verification/validation projects up to 6x faster than with Excel

- Spend 95% less time on manual data entry, calculations and reporting

- Reduce routine quality work by 20%

- Eliminate human errors

- Effortlessly verify tests and instruments within or across labs

- Focus on result interpretation rather than manual work

- Effortlessly stay compliant with the latest protocols and guidelines, such as ISO 15189, ISO 17025, and the new IVDR.

Developed since 2011 in Finland, today Validation Manager empowers laboratories across 16 countries and is trusted by the leading labs including SYNLAB, Unilabs, Eurofins, NHS South West London Pathology, Labor Mönchengladbach and Oslo University Hospital.

**NHS**
**Bedfordshire Hospitals**
**NHS Foundation Trust**

*"Validation Manager enables us to produce valid verification/validation reports without the need for advanced math statistics knowledge. Now, our validation/ verification process can be completed by most staff levels."*

Ana Teles, Clinical Biochemistry Section Lead

**Sláinte Leanaí Éireann**
**ag Sráid an Teampaill**
**CHI**
**Children's Health Ireland**
**at Temple Street**

*"Without doubt, Validation Manager has enabled us to progress instrument verification and method comparison projects at a much faster rate with current staffing levels, as opposed to our previous Excel-based approach."*

Denise O'Toole, Laboratory Quality Manager

# How Validation Manager empowers your laboratory

## Save valuable time

**Seamless data handling.** Eliminate manual data entry with one-click data imports from various sources: instruments, middleware, LIS, and spreadsheets.

**Instant performance insights.** Transform raw data into actionable performance metrics effortlessly, saving you from tedious analysis and calculations.

**Effortless reporting.** Automate the entire reporting process, taking your data from raw to review-ready reports in just a few clicks.

## Elevate your laboratory's quality

**Streamlined consistency.** End the struggle of aligning processes across your team. Create standardized templates for verifications and reports, ensuring 100% comparable results effortlessly.

**Real-time performance monitoring**. Maintain continuous oversight of your lab's performance. Track performance metrics and KPIs in one place for proactive management.

**Timely issue resolution.** Identify and address instrument, method, and reagent issues as they arise. Stay ahead of challenges and maintain smooth operations.

**Regulatory compliance made simple.** Keep pace with ever-evolving regulations effortlessly. Validation Manager ensures you use the latest protocols when making conclusions about your quality.

**Precise performance insights.** Automated measurement uncertainty calculations provide valuable day-to-day and long-term performance insights for your methods.

**Performance at a glance**. The intuitive traffic light report offers a quick, visual way to guarantee your lab's performance remains top-notch.

## Enjoy smooth accreditations

**Effortless collaboration.** Gain valuable performance insights across your laboratory with centralized quality data and easy report access. Save hours by seamlessly sharing data with colleagues during project phases, from planning to execution, review and acceptance.

**Simplified accreditation.** No more searching for the latest reports or measurement uncertainty calculations. Easily log in and share data for accreditation and quality reviews. All data is traceable from end report to instruments, reagent lots, laboratories, users, days, and more.

**Trusted across Europe.** Validation Manager has been used across Europe for many years, so the verification reports are widely accepted in accreditations by different organizations such as DAkkS, FINAS, UKAS, and more.

**Quality control beyond the lab.** As Validation Manager is a cloud-based solution, you can continue working remotely on quality as if you were inside the laboratory.
