FINBOURNE

FINBOURNE
Technology overview

FINBOURNE Technology has created an interconnected network of functionality and data that helps its clients deliver what their clients need in a constantly changing world. It is a market leading provider of investment management solutions and a best-in-class cloud native data management platform to the global financial services industry.

We help organisations redefine what's possible with data by giving decision makers the data management tools, core investment functionality, and market access needed to drive success across the investment lifecycle.

Who we serve

Built for the financial services industry, we empower investment data processes and drive operational growth for emerging hedge funds through to established global institutions.

ASSET MANAGERS > ALTERNATIVE ASSET MANAGERS > ASSET OWNERS > ASSET SERVICERS

Our solutions

All our solutions are built on our platform components which ingest, clean, master, store and enrich financial and nonfinancial data.
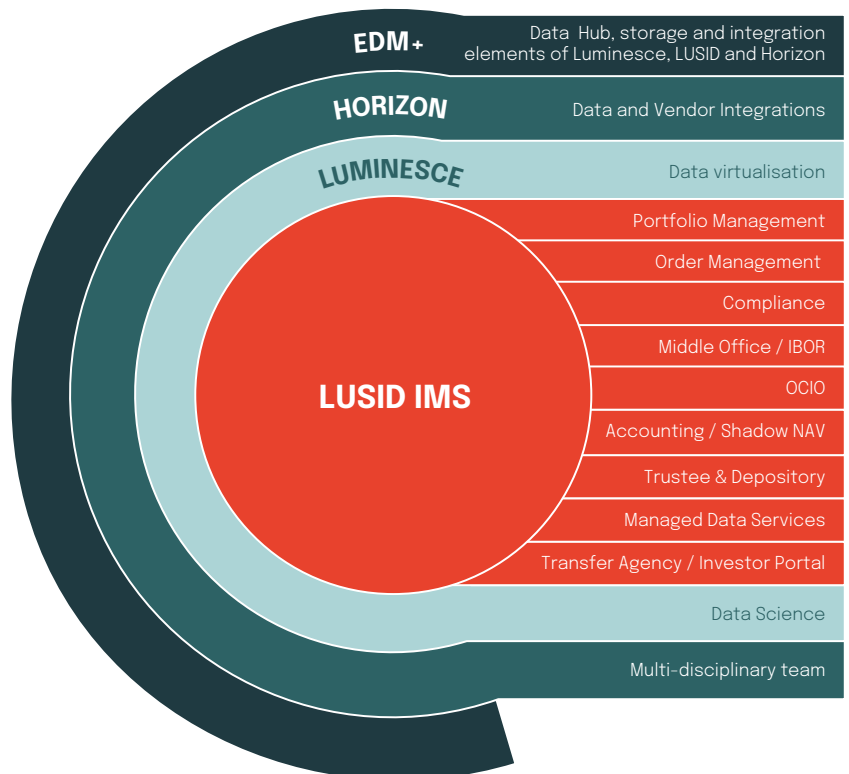

LUSID ingests and makes sense of all your data, creating a single, clean, reconciled, source of truth.

LUSID also provides your front, middle, and back-office teams with the technology they need to grow, run, and protect your business.

LUMINESCE integrates data from any source, providing it to the systems and end users that need it.

LUMINESCE also comes with advanced data science tools that enable detailed analysis of your data.

HORIZON provides integrations to major data sources, as well as access to a multidisciplinary team to help manage technical and commercial relationships with vendors.

EDM+	Data Hub, storage and integration elements of Luminesce, LUSID and Horizon
HORIZON	Data and Vendor Integrations
LUMINESCE	Data virtualisation
LUSID IMS	Portfolio Management
	Order Management

	OCIO
	Accounting / Shadow NAV
	Trustee & Depository
	Managed Data Services
	Transfer Agency / Investor Portal
	Data Science
	Multi-disciplinary team

How are we different?

Front-to-back, every asset class
Built by financial services experts, clients can manage all aspects of the investment cycle and view their entire portfolio in one place, across public and private markets.

The backbone for impactful AI
Next-generation technology helping our clients combine internal and external, financial and non-financial, data sets, including Large Language Models (LLMs) with an AI Assistant.

Right data, right time, right place
The industry's most advanced data virtualization capability, Luminesce allows clients to solve any data problem by leveraging real-time data from any source.

Cloud-first
Cloud-native solutions hosted on AWS and Azure bring flexibility, scalability, performance, resilience and cost benefits

Invested in Security
Products and platforms that are built to be secure by design and meet financial industry best practise, including SOC 2 Type II and ISAE 3000 audited status.

Easy to implement
Modular, API-first, developer-friendly solutions that are simple to integrate and implement, either as an augmentation or replacement to current platforms and systems.

We are trusted by some of the world's leading financial services firms
