Modernize with Finchloom

FLIGHT
Professional Services

Our FLIGHT program was built around Microsoft Azure, Microsoft 365, and Dynamics 365. We offer consultations and managed roadmaps for Cloud Infrastructure, Cloud Migrations, Security & Compliance, App Hosting, Modern Workplace, Teams Phone System, Helpdesk, Device Management, and more.

FLIGHT starts with a 1-day session to learn your business goals and requirements. Then the roadmap is produced, prioritized, and executed. With FLIGHT, you will pay one single monthly price which is all-inclusive. Available in 3 month or 6 month terms.

Managed Roadmap

Customized Managed Roadmaps are the key to our FLIGHT program. They are the blueprints used to direct and prioritize the solutions that we will implement. The Managed Roadmap is crafted in collaboration between our Cloud Consultants and your IT Team. An Assessment can be done up front to determine the current state of the business IT, the desired state of the business IT, and the projects needed to fill the gaps to get to where your business wants to go.

Project Services

Our team of Microsoft Engineers can assess your pain points or business requirements and put together a proposal for scope of work to achieve your Microsoft Cloud goals. If you need to upgrade your Hybrid Environment or perform a full migration to the Cloud, our team can produce a quote for a one-time project with a start and a finish. Our team spans a variety of Microsoft Workloads, visit our website to see a list of our workload capabilities.

Staff Augmentation

If you do not want to hire a full time employee on your IT Admin team, we can provide you with Microsoft and Azure technology experts on a pay-as-you-go model.
- Virtual CIO
- Onsite Desktop Support Technicians (PC & Mac)
- Onsite Administrator
- Onsite Engineer

Key Results

- Effortless Migrations
- Lower IT & Office Space Cost
- Secure workspace environments
- Flat Monthly Rate
- Advanced Support... and more!
