

Security & Compliance for AI Agents

Ensure your AI agents are ready to be deployed to production safely

Why do you need a security layer for your AI Agents?

By 2026, **80 % of enterprises** will integrate AI agents (Gartner, 2025).

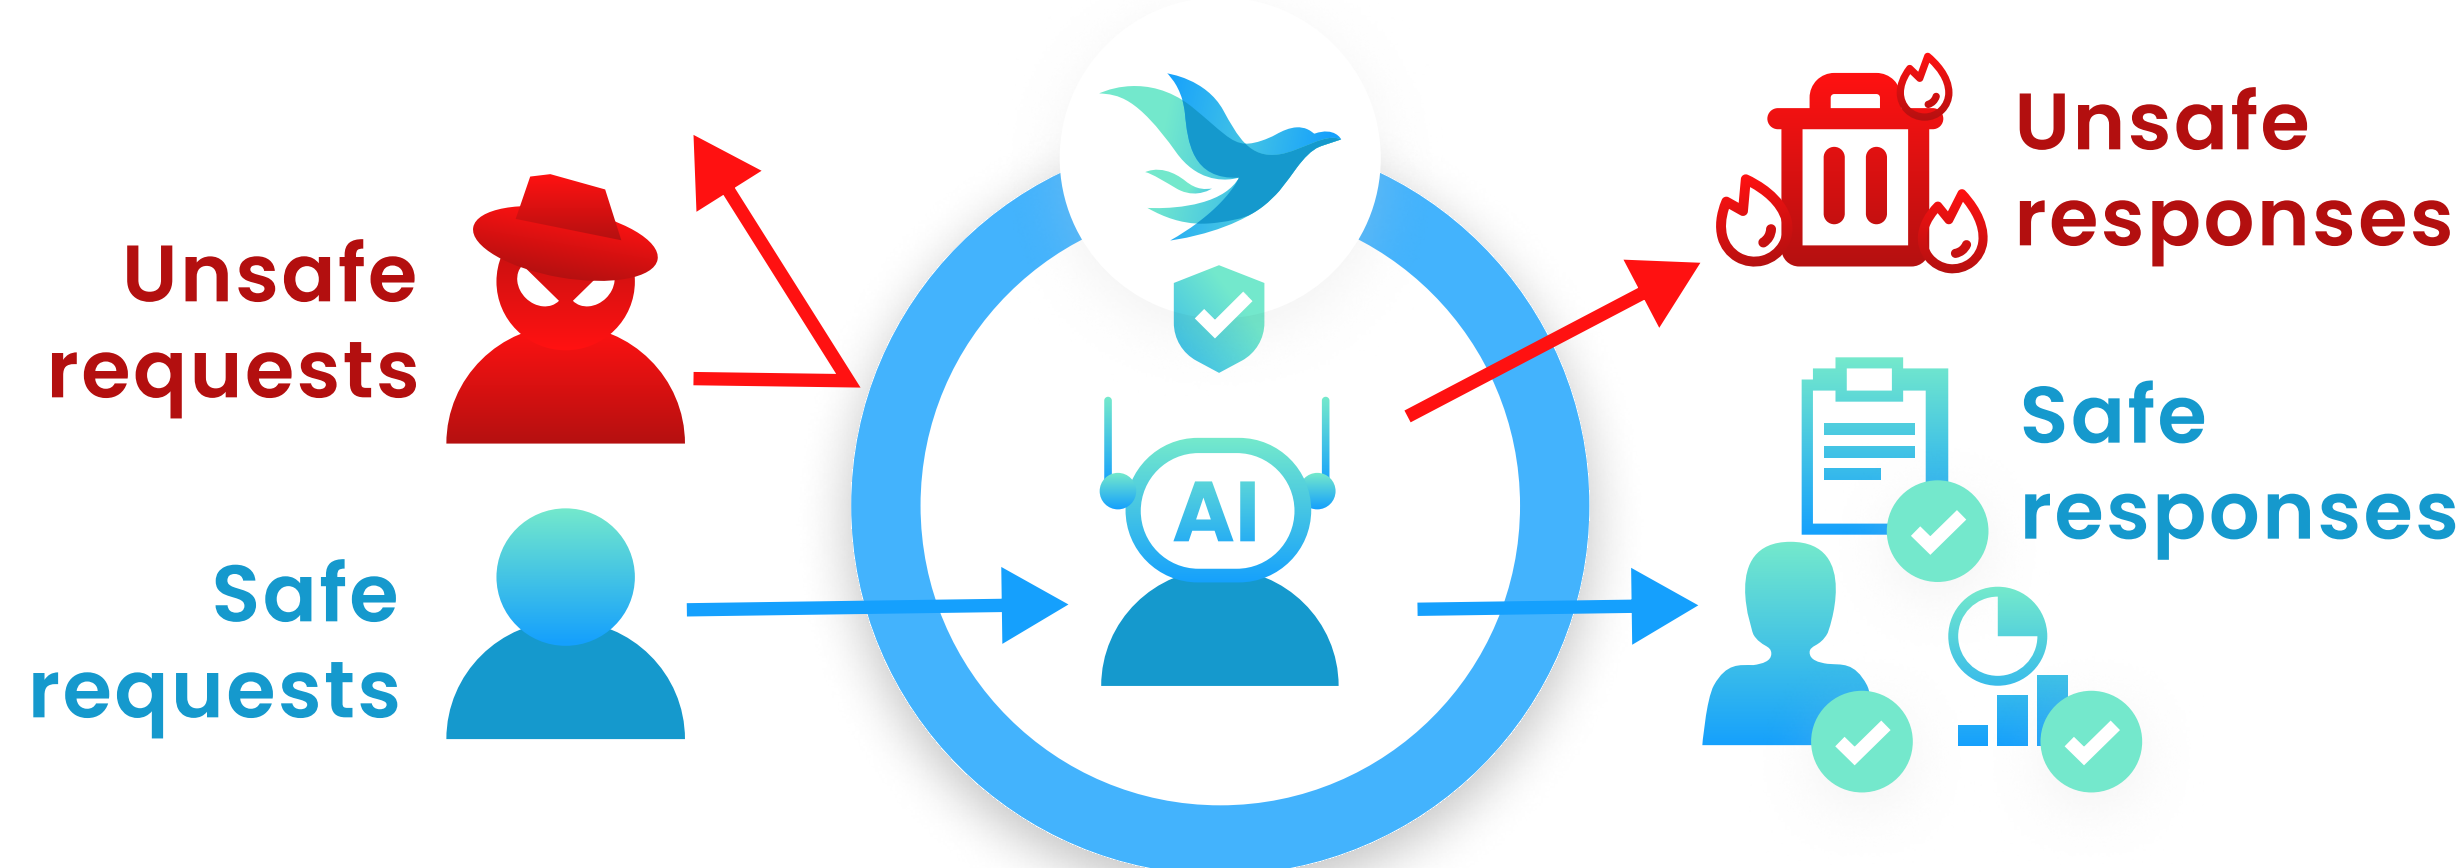

Yet, **46% of AI projects fail** because of **security & compliance issues**, resulting in a waste of **millions of dollars** per year for organizations (S&P Global Market Intelligence, 2025).

Deploying AI agents **without proper protections can lead to disaster**.

Today, you need airtight security and compliance for your AI agents, **without draining your development resources**. That's exactly where **Fireraven delivers**.

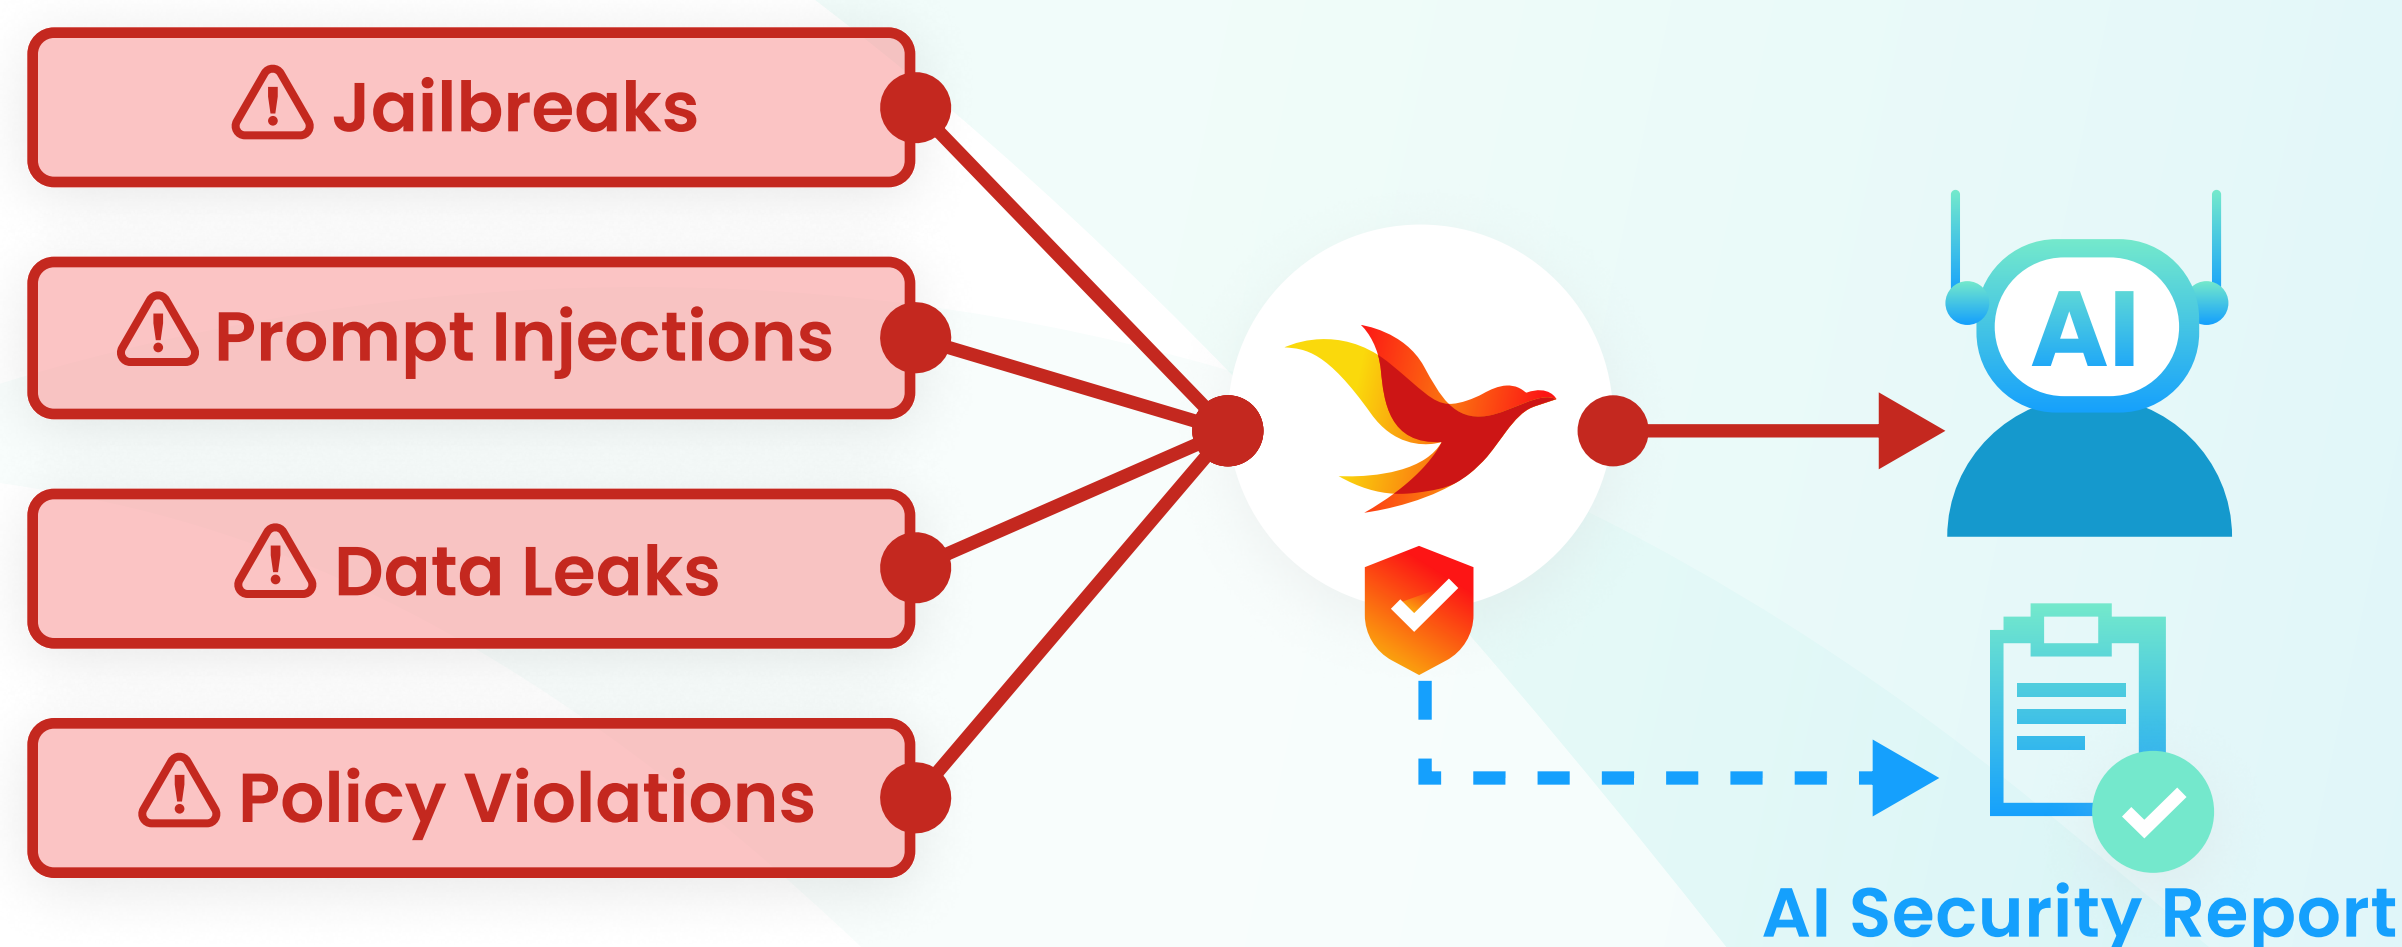

FireGuard > Real-time AI Firewall

- Guardrails for your AI agents (Firewall for AI).
- 3 lines of code, seamless integration, no AI expertise required.
- Highly customizable policies to ensure security and compliance with your specific use cases.

RedRaven > Continuous AI Red-teaming

- Automated Red-teaming to find vulnerabilities and assess your AI agents' security.
- Recurring security assessments to catch issues early.
- Proprietary vulnerabilities exploration technology.

Why Clients Choose Fireraven

- **3.5x ROI**
AI security integrated in days, instead of months, saving money and momentum.
- **Security-first architecture**
Security guardrails and real-time LLM firewalls, deliver compliance and peace of mind.
- **Seamless integration**
No technical expertise required, customizable protections.
- **AI security expertise**
Benefit from Fireraven's deep expertise in AI security and compliance, exceeding baseline guardrails.
