PISARA

## Mobility, innovation, and efficiency are now at your fingertips

Pisara is a cloud – based, management friendly, and parent-handy enrollment system created by First Datacorp. With so many years of working with academic institutions, First Datacorp has identified that one major pain points in schools is the enrollment process.

Since Pisara is based in the cloud, enrolling can be accessed by the parents and administrators at anytime and anywhere, as long as they are connected to the internet.

Parents will only be able to see the student information, tuition assessment and supplies needed. On the other hand, the school administration will see and amend the class schedules, class lists, tuition and payment modes, and so on. The school further restrict the user and access, depending on function.

KEY BENEFITS

- **Cost efficient and Savings.** No additional investment for storage facilities or maintenance. Less Electricity Consumption

- **Security.** User is defines by roles. Storage in the cloud is guaranteed by Microsoft.

- **Accessibility.** Can be available anytime, anywhere through any device via we browser.

- **Easy to Use.** Simple interface with easy modification and management. Updates area readily available online and very user – deployable.

Online Payment And Transaction

- View Transaction History
- Notification every transaction made
- Installment Payment Reminder

Once the payment is processed, parents will then receive a receipt confirming their payment has been securely processed and accepted.

Easy Enrollment
