FIS MANAGED IT SOLUTIONS

One slide summary

FIS MANAGED IT SOLUTIONS

THE CHALLENGE

The industry is strapped for high quality human talent to help you achieve your goals. You need the right mix of tools and processes, but the right talent is what makes an effective IT plan hum. If you are working with less than the best, it is far more likely that a security event will create massive financial struggle, and perhaps even put you out of business. Aging infrastructure and legacy systems only serve to reduce your operational and financial agility. You should be able to find a partner who can deliver the best people, processes and tools in one package to help you not only stay alive, but thrive.

THE SOLUTION

Reducing costs, enhancing the customer experience, and improving operational efficiency remain top priorities for organizations of all types and sizes today. To be competitive and enable business growth in today's "new normal", organizations need to improve their speed-to-market and agility and remove IT as a barrier. Navigating the complexities of data security and regulatory requirements while modernizing a technology platform is challenging for even the most sophisticated IT departments, but they don't have to go it alone. A partnership with FIS Managed IT enables our clients to re-focus their energy on key business initiatives and enjoy the peace of mind and confidence that a fully managed and secured IT environment brings.

MANAGED CYBERSECURITY
FIS provides fully managed, multi-layered data, environment and network security in a complete, homogenous platform.

MANAGED RISK
FIS teams assess and improve your risk levels, update disaster recovery plans, manage third-party vendors and regulatory and compliance processes.

DATA SECURITY
Our security practices are constantly audited and modernized to ensure you stay ahead of today's cyberthreat environment.
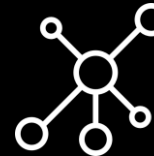

IT GOVERNANCE AND SUPPORT
Our all-encompassing operations solutions, including service desk management, engineering and more, make it easier for you to do business.

MANAGED NETWORK
FIS can design, deploy and manage an end-to-end solution utilizing traditional and next-gen networking solutions.

MANAGED CLOUD
FIS Managed Cloud Services eliminate the need for institutions to host an on-site data center while maintaining security, reliability and control.

UNIFIED COMMUNICATIONS
FIS provides comprehensive communication solutions that enable both the traditional office and remote workforce under a single service.
