Enterprise Payments Platform

2021

We help you
streamline payments
workflows, modernize
and replace legacy
technology, and create
new consumer
products and services.

Enterprise Payment Platform Capabilities

High-Value Payments

Scalable solution capable of handling complex domestic and international high-value payments regardless of transaction volume.

Real-Time Payments

High performance, real-time payments processing for the RTP® network from The Clearing House (TCH).

Wire Payments

Highly scalable wire processing for financial institutions of all sizes, improving processing efficiency and significantly increasing STP rates for payments processing.

Financial Messaging Using SWIFT

Fully managed, low-cost, high-speed SWIFT messaging service for affordable use of the SWIFT network's services and financial messages.

Wide-range of Capabilities

Supports Fedwire, SWIFT, ACH and The Clearing House Real-Time Payments (TCH RTP®).

ISO 20022 and SWIFT gpi-compliant and supports SWIFT Universal Confirmations.

Solutions scale up or down across volume and functional needs.

Open architecture efficiently integrates with any upstream or downstream applications, such as fraud and AML – giving you complete visibility and control of the end-to-end payments flow.

On-premises or hosted solutions can deliver as plug-ins to existing technology or as a complete modern payments platform.

ACH, wire and instant, real-time payments, across the U.S., Europe, the Middle East, Africa and Asia-Pacific.
