

# Managed Security Services for Microsoft Sentinel

## SERVICES:

24/7/365 health and real-time monitoring and analysis and management

Sentinel architecture and engineering services

Sentinel data source and connector review services

Sentinel report and workbook implementation services and review

Sentinel analytics rule implementation services and review

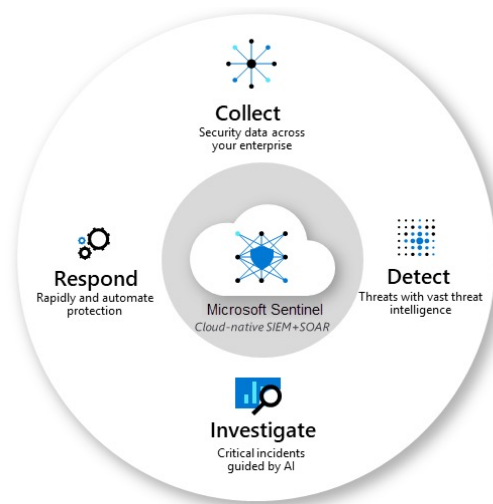

Sentinel playbook implementation and review

Proactive and reactive threat hunting

Threat intelligence source implementation and review

Microsoft Sentinel delivers intelligent security analytics and threat intelligence across your entire enterprise. With Sentinel, you get a single solution for attack detection, threat visibility, proactive hunting and threat response.

- 1. Collect data** at cloud scale across all users, devices, applications and infrastructure, both on-premises and in multiple clouds.
- 2. Detect previously unseen threats** and minimize false positives using Microsoft's analytics and threat intelligence.
- 3. Investigate threats** with artificial intelligence, and hunt for suspicious activities at scale, tapping into years of cybersecurity work at Microsoft.
- 4. Respond to incidents rapidly** with built-in orchestration and automation of common tasks.

Cyderes designed our industry-leading MDR for Sentinel/E5 to be deployed quickly and effectively, immediately impacting your overall security posture by improving your overall SOC maturity. Cyderes works to collaborate with your organization, leveraging Microsoft Sentinel & Defender to identify areas where further security value, financial efficiencies, and automation/enrichment support improve your security ROI.

### Key Features:

- Review of data sources and data connectors
- Creation of reports and workbooks
- Build analytic rules to create actionable incidents from detected alerts and periodically review for gaps and new threats
- Build playbooks to automate and orchestrate common tasks and responses within the defined environment, including implementation of connectors that may be required
