

Fast & Powerful ETL

Extract - Transform - Load

Refresh

Maintain up-to-date flat files when data changes in your source app.

Rapid

10-minute refresh cycles mean your data store is near real-time.

High-capacity

Reliably flatten billions of cells to CSV files without hiccups.

Merged datasets

Export left-joined combo objects like deals+contacts.

Write options

Refresh one flat file or create a stack of timestamped versions.

Filterability

Include only the columns or views essential for your reporting.
