

Data Coalitions

Sensitive Data Management

Measurable Results

- Reduce agreement setup times from 6 months to 6 days then 6 hours, then 6 minutes
- Transparency on all data shared across the organisation or between organisations
- Reduce costs to setup and to operate

Key Benefits

- Increased transparency for your organisation
- Compliance with regulatory controls
- Simplify complex information flows
- Drive new value creation through innovation

Professional Platform

- SaaS
- Secure API
- Fully configurable
- Highly secure

Flusso streamlines the complexities of accessing, maintaining and managing sensitive data, integrating all processes and third-party compliance requirements into a single consistent party-to-party or multi-party solution

Our platform is based on the Contextual Integrity framework developed by privacy thought leader and our advisor, Prof Helen Nissenbaum. Flusso maximises your productivity, contains your risk, improves business performance across your organisation, and enables you to drive new value creation through innovation

Risk Management

For businesses that handle any kind of sensitive data there are limitations on what can be shared and how that data can be used

DC can manage that risk for you and enable you to realise the benefits for accessing this information

Regulatory Compliance

Whether operating in a single geography or across multiple territories, domestically or globally there are increasing compliance complexities

DC can manage that compliance and provide evidential information for all your data sets, flows, and data sharing activities

We can remove the administrative burden and provide an ongoing reduction in operational complexity across your organisation

Drive Innovation

Sensitive data is critical to improve core services, although most attempts are abandoned before true value can be realised

Flusso enables you to access this information secure in the knowledge you are doing so in full compliance with regulatory requirements

The Economic Value

Globally governments and organisations are increasingly realising the bottom line benefits of sharing sensitive data:

* Data access and reuse can generate social and economic benefit of 1 to 2.5% of GDP

* New innovations expected to increase the annual economic value of data sharing up to €7-11 billion by 2028 for the EU alone**

* €1.3 trillion in increased productivity in manufacturing through Internet-of-Things data and by 2027 savings per year.**

* €120 billion in savings per year in the EU health sector.***

* OECD (2019). Enhancing Access to and Sharing of Data: Reconciling Risks and Benefits for Data Re-use across Societies, OECD Publishing, Paris. ** European Commission (2020). Support Study to the Impact Assessment accompanying the proposal for a Regulation on European data governance, SMART 2019/0024, prepared by Deloitte. *** McKinsey (2020). Shaping the digital transformation in Europe.

Services

Realise the full value of your investment with our **Data Coalitions Readiness Assessment**

Along the way you will learn about some of the defining trends in privacy theory and tech, understand the core concepts of the Data Coalitions product and how you can leverage it to revolutionise your data management capability

Receive a detailed brief with your strengths and areas to improve data sharing, and a list of opportunities to take advantage of new privacy technology

Data Coalitions will be configured to match the requirements gathered during the assessment, ready for your organisation
