

We harness the transformative power of AI to create clarity, drive trust, and empower businesses to thrive in an increasingly data-centric world.

**Fog Solutions** is a world-class system integrator that helps you set the optimal technology strategy to meet your goals and then deliver on it. Our expert business-minded technologists deliver cost effective solutions in real world time frames. We don't sell products; we only focus on delivering the best solution.

**Business Alignment** – Each engagement is led by a former CxO or GM who knows how to deliver business impact

**Consistency** – The team you meet up front is the team you will work with

**Expertise** – We stay focused so we can stay exceptional

**Value** – We deliver value with a team of local and near-shore experts

### Our Service Offerings

#### Data & Analytics Modernization

Modernize your data estate by leveraging native cloud technologies and a strong partner ecosystem to enhance data collection, storage, analysis and visualization.

#### Generative AI Acceleration

Derive valuable insights and make informed decisions by accelerating your data science projects with expert guidance, advanced tools and streamlined processes.

#### AI Enabled Applications

Bring your data to life through AI-enabled experiences such as cloud native apps, dashboard and reports, or pre-developed ML solutions for voice, text, and video.

# Lakehouse Accelerator

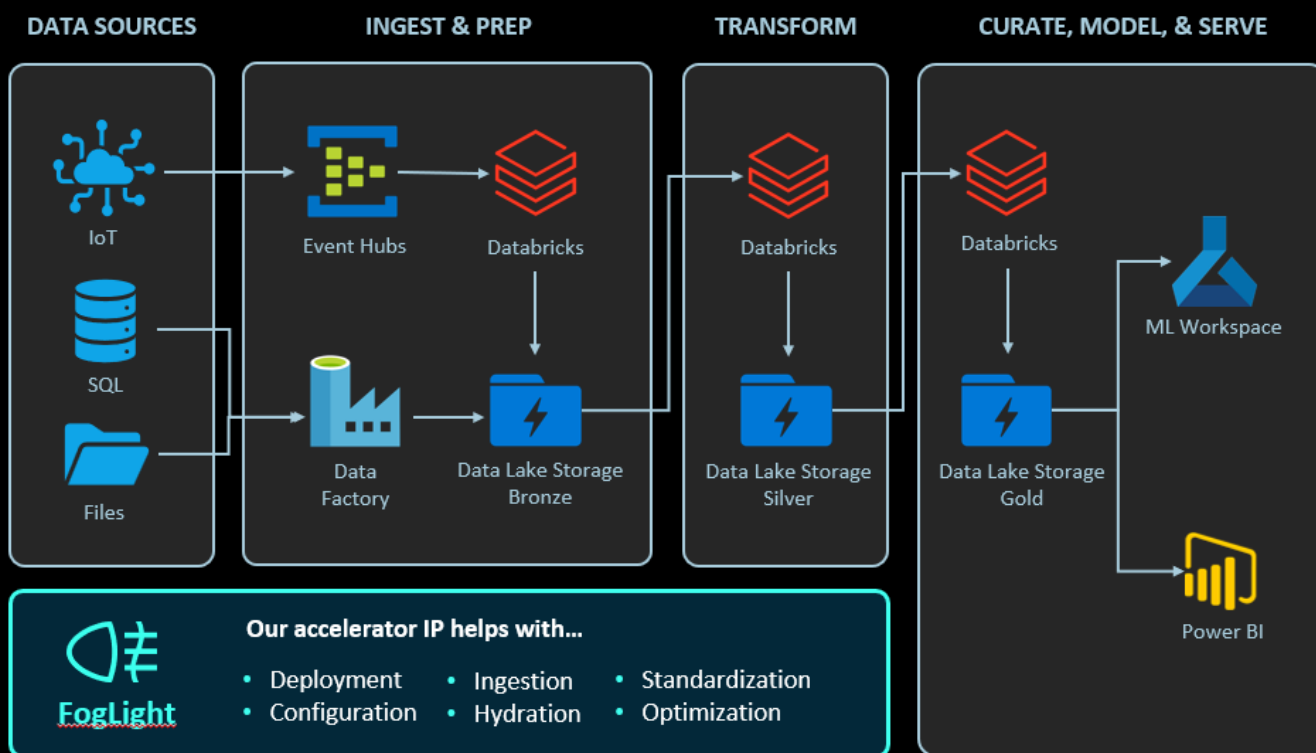

This four-week engagement will lay the foundation for a modern data platform and provide a roadmap for scaling analytics in your organization.

Outcomes delivered:

- Scalable solution architecture that delivers insights in weeks, not months
- Automated data ingestion framework
- Operational modern data platform with your data
- A road map for scaling, securing and governing your data estate

World-class AI capabilities & a Lakehouse platform that combines the best of data lakes and warehouses to simplify your data estate and eliminate complicated silos of data.
