What's a **Connector**?

A connector is a software that integrates your ERP with your eCommerce platform, Marketplace or any 3rd party application.

Folio3 **Integration** Solution

Folio3 has Connectors for **Microsoft Dynamics 365, AX and NAV** allowing you to easily integrate your **ERP/CRM** with any application that you want.

Folio3 provides both **cloud-based** and on premise **Integration Solutions** that connect different **applications, CRMs, eCommerce Platforms, Marketplaces**, etc with business processes provided by the **Microsoft Dynamics ERP**.

Integrate anything with **Microsoft Dynamics**

We can integrate Microsoft Dynamics with any eCommerce Platform, Marketplace or Application of your choice

E-Commerce Platforms

Folio3 D365

Connector Features

Item/Product Integration

From product info to images and discount vouchers, get all your data uploaded from Microsoft Dynamics to estore.

Order Status Integration

A two-way sync to successfully complete orders, thereby shortening the sales cycle and hence improved customer satisfaction.

Payment Integration

Smoothly sync payment information from your ecommerce store to Microsoft Dynamics. This give you the ability to track the payment gateway (Credit Card, Paypal, COD etc) using which the order is placed.

Shipping Methods Integration

Shipping method information sync between ERP and estore/Shipping service. Info such as tracking number, shipping carrier, days to shipment etc are tracked in the ERP.

Order/Customer Integration

Once the order is placed on your ecommerce store, the connector will automatically categorize it between new and returning customers and save them under their respective card in Microsoft Dynamics Navision.

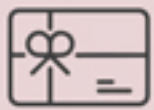

Trade Agreements

Special pricing for B2B retail and whole sale customers. You can set different pricing from channel partners and direct customers.

Inventory Management

Real-time inventory levels and product availability updates. You can track returned orders as well.

Other Customizable Features that can be added with additional Cost

Benefits of using Folio3 D365 Connector

Gain real-time visibility of inventory, sales and more with Folio3 D365 Connectors

1

Save time, make no errors

Automate data storing in your ERP and save up on time, money and decreases the chances of human error overall.

2

Track inventory in real-time

Whatever sales you make through your e-store or marketplace are reflected in your MS Dynamics ERP in real-time.

3

Streamlining critical data

Placement and fulfillment of orders, customer service and delivery; all processes are perfectly streamlined.

4

Fully customizable

Our connector can be customized in accordance with the needs and requirements of your business.

**No extra costs**

No extra charges per feed or entry.
We do not charge on the basis of sales or revenue achieved.

**Complete visibility**

A special Dashboard is available to view all processes and logs of every task performed.

**Fully integrated solution**

All the billing, accounting and sales processes are integrated with the ERP system, and multiple payment gateways as well.

Compatibility

Microsoft Dynamics 365, NAV, AX

“

Folio impressed me by learning a BI tool they did not have prior experience with and in a short amount of time produced analysis reports ready for business consumption. We are excited on the next set of critical reports Folio is working on for us and expect the relationship to continue for the foreseeable future.

“

Thought you may want to know that I've worked with a lot of agencies and outsourced development houses overseas over my time and your business is one of the most impressive I've dealt with. So professional, great communications, reasonable, commercial and nothing is ever a problem, you guys are an absolute pleasure to work with!

Simon Cheng
