ALL-INCLUSIVE

- *"How can my business improve?"* **Solved** with our Monthly Principals call
- *"How can I increase adoption?"* **Solved** with our Unlimited Training
- *"How can I control my costs?"* **Solved** with our Capacity Management and Licensing Optimization
- *"How can I…?"* **Solved** with "The Works" from Forceworks!

As the name implies, "**The Works**" is every single thing short of code. And with Microsoft's advances in the "low-code" platform, this _will_ cover everything for most customers!

You have enough to do running your business, and you want a "System" that just works… all the time. A system that has been designed, built, and is maintained specifically for your business needs. No negotiating agreements or watching the clock as billable hours mount up. The entire challenge moved off of your plate so you can focus on your business priorities.

Think about how much time, money, and frustration you have spent, or will spend, getting a system deployed, configured, supported, and extended to meet your actual goals of increased sales or decreased costs or happier customers, or whatever your original goals were.

You're Covered with "The Works"

Strategic Advice and Consulting

Tools are essential, but how and where to deploy them to impact your business positively, we can advise you.
Included with "The Works" is a monthly Strategic Advisory call with our two Principals.
Both are 20+ year veterans, and one is a Microsoft Business Applications MVP.
These calls are designed to explore and uncover opportunities to improve every aspect of your business bringing "Fresh Ideas" and "Best Practices" to the forefront.

Design

There are a lot of wrongs ways to build things. Fortunately, there are right ways also, and we know them all

Support

Your users can get stuck or confused. We can answer their questions to keep them humming along

Training

Whether onboarding a new person or a new feature, we're here to educate your team on "Best Practices"

Monitoring

What's going on with your system? How is

Data Management

Data is the lifeblood of business today.

Administration

Adding or removing users, adjusting roles,

it being used or abused? We'll keep you
posted on what we see

but bad data is damaging and costly. We'll
keep an eye on it

updating configurations... we can do this
in our sleep... but we'll be awake

Deployment

Just getting started, or adding a new
environment? We'll take care of that and
shoot you over a login when it's ready

Reporting

How many green widgets did you sell on
St Patrick's day? Not a problem, we'll whip
up a chart!

Customization

Our team is at your service by adding
tables, columns, forms, views, workflows,
dashboards, etc.

Automation

Eliminating repetitive manual actions or
processes not only saves time but
increases accuracy. We do this
"Automatically"

Security

Bob needs to see the whole alphabet, but
Sally should only see A, K, and Z? No
problem, we'll wire that up for you

Cost Management

User Licensing and Data Capacity are not
free! We'll closely monitor to make sure
you never pay more than you need.

"The Works" App

Coming Soon: "The Works" app, a solution installed in your environment for easy user access to included services and more!
