Implementation of Microsoft Copilot

forefront

Transform your organization's productivity with our offer for implementing Copilot for Microsoft 365. Our package includes a pilot program with training and feedback gathering, a detailed plan for phased rollout, and updated training material based on pilot feedback. We'll also help you establish a governance model for Copilot and provide a structure for ongoing feedback and action planning. With our expert support, you'll be able to unlock the full potential of Copilot and empower your team to work smarter and more efficiently.

Deliverables for implementation

- Pilot conducted and feedback gathered
- Plan for implementation and support during phased rollout
- Training material for rollout
- Establish the foundation for your governance model for Copilot
- Structure for feedback and action plan
