Get started with Microsoft Viva

In today's dynamic work environment, businesses must adapt and thrive in the digital age. Microsoft Viva, a groundbreaking suite of employee experience tools, empowers organizations to enhance productivity, foster collaboration, and elevate employee engagement. To harness the full potential of Microsoft Viva, Forefront Consulting as a trusted Microsoft 365 partner, is delighted to offer a comprehensive suite of services designed to help you seamlessly integrate Viva into your organization.

At Forefront Consulting we understand that adopting new technology can be a significant undertaking. Our team of experienced professionals is here to guide you through every step of the process, from assessment to implementation, ensuring a smooth and successful transition to Microsoft Viva.

Get started with Microsoft Viva

In our Microsoft Viva implementation services, we start by understanding your organization's needs and tailoring Viva to your specific requirements. Through our prestudy and assessment process, we engage in a needs analysis.

Once we have a clear understanding of your needs, we move on to the implementation and integration phase. Here, we execute a customized implementation plan, which includes deploying Microsoft Viva modules and seamlessly integrating them into your existing Microsoft 365 environment. We prioritize user adoption with comprehensive training and offer continuous support and performance optimization to ensure Viva aligns with your evolving needs.

Assess

1. Understand Organizational Goals
2. Identify Key Stakeholders
3. Conduct Employee Surveys and Interviews
4. Review Existing Systems and Workflows
5. Define Success Metrics

Set up

1. Customization
