

PROTECT YOUR BUSINESS WITH FORSYTE ACTIVE DIRECTORY SERVICES

Whether people are on-site or remote, give them seamless access to all their apps so they can stay productive from anywhere. Automate workflows for user lifecycle and provisioning. Save time and resources with self-service management.

Experience the benefits of adopting Azure Directory:

- ✓ Single sign-on (SSO) simplifies access to your apps from anywhere
- ✓ Conditional Access and multi-factor authentication help protect and govern access
- ✓ Securely engage in a customized experience with customers & partners
- ✓ Developer tools make it easy to integrate identity into your apps and services

Experience Forsyte's expert Active Directory approach:

Learn how to easily work with Forsyte experts and put Active Directory to work in your organization with Forsyte's award-winning team, recipient of Microsoft US Partner Award, Microsoft Identity and Access Management Advanced Specialization, and Azure Virtual Desktop Advanced Specialization.

Understanding the value of Azure AD has become the backbone of many organization's security and management of user identities behind the scenes. At Forsyte, we help organizations plan and prepare for what's next. We champion workload integrations and subscription assessments so our clients understand what is available in various Microsoft 365 licenses and how to make the most of them.

Work with Forsyte managed IT to adopt Azure Active Directory.

Connect your workforce with frictionless access to apps anywhere, anytime.

Engage with internal and external users securely.

Protect & govern access with MFA and Conditional Access.

Integrate identity into apps & services with developer tools.

Secure and manage users both on-premises and beyond your organizational boundaries, with one identity solution. Customize user journeys and simplify authentication with social identity and more with Azure Active Directory.
