

SIMPLIFY THE SETUP AND MANAGEMENT OF YOUR ORGANIZATION'S DEVICES WITH INTUNE.

MICROSOFT INTUNE QUICKSTART

DEPLOY - MANAGE - LEAD - LEARN

Discover the Power of Intune with Forsyte

Microsoft Intune is a cloud-based service that focuses on Windows mobile device management (MDM) and mobile application management (MAM) included in Microsoft's Enterprise Mobility + Security (EMS) suite, allowing users to be productive while protecting the organization's data.

Intune integrates with other services, including Microsoft 365 and Azure Active Directory (Azure AD) to control who has access and what they have access to, plus Azure Information Protection (AIP) for data protection. When you use Intune with Microsoft 365, you can enrich the user experience across devices, while keeping your organization's information secure.

3 Levels of Intune Support

1 Remote Guidance & Transmission

2 Remote Guidance & Implementation

3 Full Deployment & Training

Partner-led services for better deployments:
