

PROTECT. DETECT. RESPOND.

Defend against threats with Guardian 365, your key to better managed security.

Guardian 365 is an always-on cybersecurity managed service offering end-to-end protection, monitoring, detection, and remediation of attacks on your infrastructure, data, users, and endpoints. Leverage the security expertise of award-winning Microsoft Solutions Partner, Forsyte I.T. Solutions, to keep your organization secure.

Cyber attackers are working 24x7x365 to compromise your systems. When you are targeted, will you survive an attack?

Guardian 365 Highlights

-  Ongoing managed services with always-on, managed detection and response.
-  Secure Score evaluations, cyber insurance reviews, and security assessments.
-  Implementation and configuration of Microsoft 365 security solutions.
-  On-demand executive dashboards to drilldown into events for visibility into security insights.

Protection is key to the security of your organization.

In the event of a cyber attack, what are your odds of total remediation?

Guardian 365's unique approach to managed security services starts with architecting a zero-trust security model, deploying the right Microsoft 365 security solutions, and monitoring the security of your organization with the Guardian 365 service 24x7x365.

Cybercriminals will attack the weakest link and you need visibility across platforms and tools to defend threats with end-to-end security management. Get 360-degree visibility and peace of mind with customized reporting for your IT security operations.
