# HOW SECURE IS YOUR DIGITAL TRANSFORMATION?

Securing your digital transformation journey can be a make or break decision. Work with one of our DT security experts to gain insights with a detailed assessment & cover the gaps.

# WHAT IS A DT SECURITY ASSESSMENT?

## We have developed a process to:

- Assess your current environment & security practices
- Identify optimal tools & applications to fill security gaps
- Budget for the acquisition & implementation of future plans
- Measure the effectiveness of your security posture

#### The assessment follows a 3-Phase Process:

#### Phase 1: Assessment & Review

- Discuss triggers & security objectives
- Discuss projects in progress
- Review the threat landscape of your organization
- Identify opportunities to increase security posture

#### Phase 2: Analysis & Recommendations

- Discuss current security status, risks, & threats
- Discuss improvements for your organization:
  - Identity & access management
  - Security & data protection
  - Data backups & disaster recovery
  - Device management

### Phase 3: Briefing & Next Steps

- Present findings & recs based on vulnerabilities
- Provide road maps & next steps

## Working together, you will be empowered to do more.
