

POWER & SCALE YOUR INFRASTRUCTURE WITH ADVANCED CLOUD SECURITY

Secure your comprehensive infrastructure of on-premise, in-the-cloud, & hybrid cloud with innovative technologies that evolve to meet your ever-changing threat landscape.

AZURE SECURITY + MICROSOFT SENTINEL

Staying on top of the always-changing security landscape presents a major challenge for organizations and cybersecurity will continue to have the greatest impact on industries into the future. Fortunately, the power and scale of the public cloud has unlocked powerful new capabilities to stay ahead of the changing threat landscape and Forsyte leverages this power with innovative solutions for your organization.

As cloud-based security technologies continue to evolve, Forsyte has created a unique way to deploy advanced solutions tailored to your environment for added layers of protection. Forsyte has a long history of providing foundations for success and offers Microsoft Sentinel Consulting Services to ease your ongoing security concerns.

Forsyte's Microsoft Sentinel Consulting Services:

- ✓ Examine on-prem and cloud envisioning & discovery with your team.
- ✓ Deploy Azure Sentinel & Azure Security Center to support both on-premises and cloud deployments.
- ✓ Customized auditing & reporting for your security platform, provisioning & access certification rules.

Security is everyone's business. Support your environment with the help of Forsyte and Microsoft technologies such as Microsoft Azure Sentinel (a cloud-native Security Information and Event Management (SIEM)) with advanced AI and security analytics to detect, hunt, prevent, and respond to threats across your enterprise.

Combine the power of Forsyte, Microsoft 365, & Microsoft Sentinel to meet your hybrid cloud objectives. Working together, you will be empowered to do more.
