

Microsoft Places

FORTÉ ensures a seamless Microsoft Places deployment so you can unlock hybrid scheduling, location insights, and smarter space utilization—from day one.

What is Microsoft Places?

Microsoft Places is an AI-Powered Workplace tool that helps users coordinate where work happens, modernize the workplace with intelligent technology, and optimize how office space gets utilized. It solves common hybrid headaches like scheduling confusion and missed connections with AI-powered tools while giving organizations the data they need to make smarter real estate decisions and right-size space investments.

Why Choose FORTÉ to Deploy Microsoft Places?

FORTÉ offers a comprehensive suite of consulting services to ensure the successful deployment of Microsoft Places for its customers. In the case of Microsoft Places, FORTÉ played a critical role in the development of the product, providing feedback and testing as it was being built.

As a Microsoft partner, we guide organizations through strategy, setup, and adoption. Our services include building custom implementation roadmaps, configuring Microsoft Exchange, converting floor maps into interactive booking systems, and setting up secure governance policies. We also provide in-depth training to ensure employees are confident using Microsoft Places from day one.

Key Benefits

1. Accelerate your journey to an AI-Powered Workplace with expert support and strategic guidance
2. Ensure smooth integration with your Microsoft 365 environment for minimal workflow disruption
3. Strengthen security and compliance with robust policies and governance structures
4. Improve workspace efficiency by converting physical layouts into digital, bookable spaces
5. Improve user experience and adoption with hands-on training and change management
