

Simplify the Optimization of Database Health

ENTERPRISE VISIBILITY

Fortified WISdom allows organizations to manage their large, complex data environments within clear-cut, easy-to-read dashboards which allows for the measurement of the health, performance, and growth metrics of systems in seconds.

WORKLOAD HEALTH

Fortified WISdom features Workload Intelligence makes performance and database health data simple by providing single scores measuring the health of the Database Workload (CPU, Memory, Storage and Database Contention).

CAPACITY PLANNING

Optimize and right-size the database server without sacrificing performance by leveraging WISdom's real-time capacity planning and performance KPIs which saves most enterprises 25% to 50% of their resources and costs.

PERFORMANCE OPTIMIZATION

WISdom's top down approach allows DBAs and developers to optimize the top code, blocking chains, deadlocks and other resources, which allows enterprises to truly optimize the most impactful processes today.

FORTIFIED EXPERTISE

As a leader in scaling enterprise systems and optimizing mission-critical workloads, Fortified applied their expertise and built a Workload Intelligence Solution - Fortified WISdom. WISdom not only incorporates Fortified's best practices learned over 20 years, but also the technical community's expertise. Fortified WISdom provides the same system performance improvements and technology investment optimizations that Fortified delivers every day to its clients across the globe.

OUR UNIQUE APPROACH

- ◆ Proprietary workload health scores show the health and capacity of systems in real time
- ◆ Identification, prioritization, and recommendations of corrective actions to meet critical business objectives
- ◆ Top-down analysis that recognizes anomalies and unique opportunities to gain efficiencies
- ◆ Optimize servers or the enterprise for a potential 50% - 75% save on resources, support, and licensing cost

Don't simply monitor your SQL Servers, Optimize Their Health

Enterprise Management

- ✓ Manage 1,000s of databases with a single view of the environment's Availability, Stability, Performance and Capacity
- ✓ An agentless installation allows you to deploy in minutes while a web based experience gives you answers quickly
- ✓ Pivot performance and configuration data across the environment to find enterprise savings

Performance Management

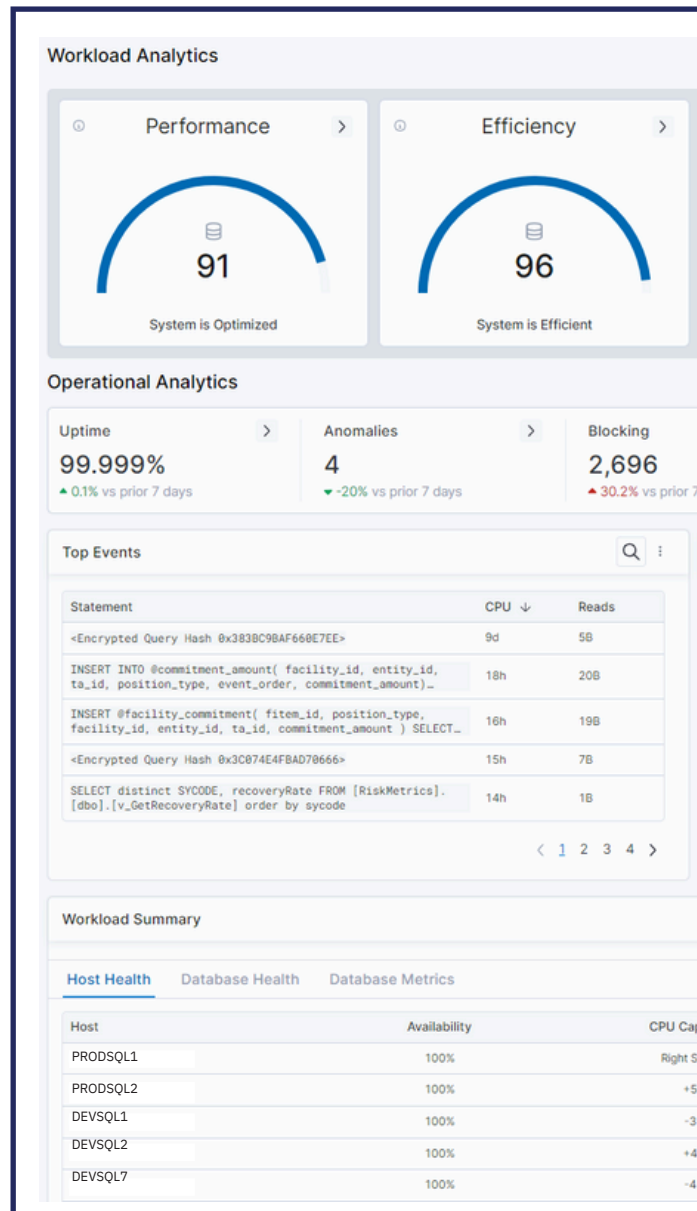

- ✓ Smart data collection to minimize performance issues on the system you are monitoring
- ✓ Optimize the top processes across the enterprise, database, or workload to save time and resources
- ✓ Take the complexity out of determining performance issues with Workload Health scores

Diagnostics & Analytics

- ✓ Identify the unique blocking and deadlock chains with actionable recommendations to solve them quickly
- ✓ Machine learning understands your workloads and identifies anomalies across thousands of workload metrics
- ✓ Access historical data for years so you can see the progress you are making while planning for the future

The Cloud

- ✓ Determine the right cloud service offering that will optimize your licensing and workload costs
- ✓ Monitor and manage cloud PaaS offerings including Azure, AWS, and GCP

Determine the health, efficiency, and capacity of your database environment.

Fortified WISdom is My Crystal Ball

“ Fortified WISdom is my Crystal Ball - it allows me to see into every aspect of my databases in one application. In my 20+ years of experience as a DBA, I've utilized many management softwares, and WISdom stands out because it saves me time and I love the ability to get to the root of the problem quickly and easily. WISdom User, Financial Industry
