Microsoft Security Copilot

Microsoft Security Copilot is an AI cybersecurity product that enables security professionals to respond to cyberthreats quickly, process signals at machine speed, and assess risk exposure in minutes.

Our Solution

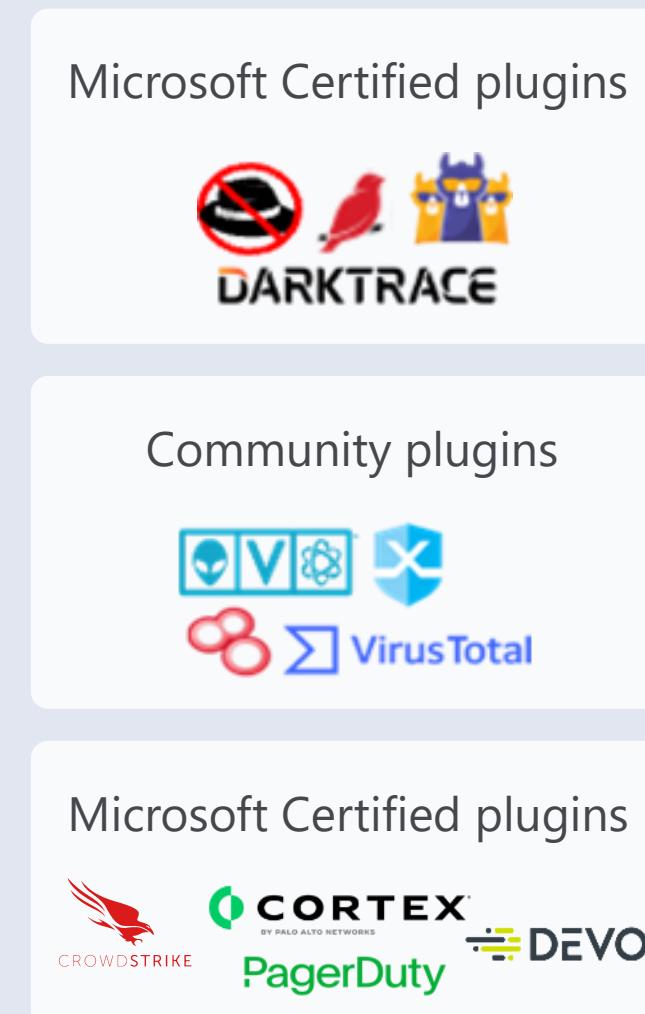

Accelerator

Empowering customers with best practices, tailored training, and use case recommendations to leverage Microsoft Security Copilot, providing end-to-end support for comprehensive security management.

Advanced Integration

Enhancing Microsoft Security Copilot with tailored integrations, including third-party solutions beyond Microsoft official support, and developing custom solutions upon request for seamless system integration.

Evaluation

- Review Microsoft Tenant configuration
- Review usage
- Validate use-cases

Design

- Architecture
- Plan capacity
- RBAC

Implementation

- Implement
- Plugin enable
- Develop prompt

Transfer

- Conduct knowledge base
- Build best practices
- Plugin/Source code deliver
