

Responsive and Effective Decisions with Digital Boardroom

The information has become a critical factor for managing businesses. With the explosion of data availability, various new opportunities have been unlocked. However, it is very challenging to fully utilize accessible information to benefit business development.

Understanding both the opportunities and the challenges of data analytics, we introduce a new business intelligence solution called Digital Boardroom. Digital Boardroom is a packaged end-to-end solution that helps enable business stakeholders with insightful data analytics. With complicated data models and business reports are managed and optimized by Digital Boardroom, stakeholders now can focus on analyzing real-time data to provide strategic decisions.

Why should you use Digital Boardroom?

- Actionable insights from relevant information resources and data-driven analytics.
- Reduce efforts needed for reports generation and management.
- Near real-time data for instantaneous planning and executions.
- Enhanced data reliability and availability.

Data-driven analytics

- Simplify complicated processes to help focus only on data.
- Organized interactive reports for different business aspects.
- Supported by AI/ML to offer predictive analysis capability.

Focus on real value.

Data availability

- Near real-time data is available to allow responsive reactions.
- Data precision and consistency is guaranteed.
- System uptime is ensured to be over 99.99% on the cloud.

Access it anytime, anywhere.

Information security

- Certified processes with high security standards.
- Permissions are managed for everyone separately to prevent sensitive data leakage.
- Security monitoring and logs.

Analyze data with safety.
