Use Cases

We believe that making a good forecast requires innovative solutions. Incorporating external factors which influence day-to-day fluctuations in demand is critical in producing accurate and effective predictions.

- Cosmetic sales forecast**
 for sales visit planning
- Prescription forecast**
 for stocking optimization
- Late payment forecast**
 for insurance rate optimization
- Automobile parts forecast**
 for stocking optimization

Why should you use Use Demand Forecast Solution

- ◆ Shorter time to market: *Introducing AI-based demand forecasts will be months to weeks*
- ◆ Automated external data Exploration : *Weather, demographical, SNS...*
- ◆ Accuracy based pricing model : *Cost only calculated if accuracy $\geq 80\%$ with Usee E2E (End to End)*
- ◆ Reduction of operation effort : *Usee is offered as SaaS and customers do not need to operate its infrastructure*
