

Fractal's Intelligent Collections Management

AI-Driven Collections & Deductions expediting Account Receivables

IMPACT

Order to cash process can drive efficiencies up to 3-5% of EBITDA

AI Powered Order to Cash

Predictive-first O2C process that is anchored in advanced technology and powered with machine learning

Flexible & Modular Arc

Unified, Azure focused architecture, 30+ connectors, robust data platform, enterprise features, scalable with accelerated deployment

Human Centered Design

Distilled in-depth insights from actual user needs and challenges for enhanced user engagement & experience

Track 300+ KPIs across the Order to Cash process to improve cash flow, reduce days sales outstanding (DSO), and enhance customer relationships

Six Broad Components of Solution Approach

Deductions

Automated NLP-driven dispute resolution, efficiency improvement

Billing

Automated and accurate invoicing, error reduction

Credit Management

Real-time credit evaluation, risk reduction, capital improvement

Collections

AI-ML driven collections, delinquency reduction, predictive engagement

Cash Application

Automate cash application, match payments, boost accuracy

Payments

Visibility across ageing, days to collect, payment term to improve cashflow
