Benefits

Incident response built for dynamic teams

For remote, hybrid, or distributed teams, recreate the feeling and efficiency of being in the same room, making your incident response procedures smoother than ever in Microsoft Teams.

[Get started](#)

Enhanced Problem Solving

Efficiently problem-solve with fewer interruptions and the ability to view different sets of information across multiple screens simultaneously. Check on progress without interrupting ongoing conversations and make team-wide multi-tasking possible at scale.

Maximum productivity

Stay up-to-date with an all-access dashboard designed to always keep you up to speed and find who and what you need when you need it.

Incident Management Redefined

Bridge the gap between a virtual and traditional command center allowing distributed stakeholders to use centralized digital workspaces for collaborative information sharing.

Features

Transform your incident management workflows

Share multiple screens at once

Gone are the days of waiting for your turn to share critical information. Allow multiple participants to share their screens simultaneously, making it easier to diagnose and resolve issues faster.

Breakout into response teams

Form smaller response teams, each tackling different parts of the problem while maintaining visibility of these sessions, allowing people to seamlessly engage when necessary.

Prepare your war room

Set up your war room with critical response playbooks that are ready when you need them.

Easier communication

Receive and communicate the right information at the right time with a redesigned dashboard showing the very latest activity.

Use cases

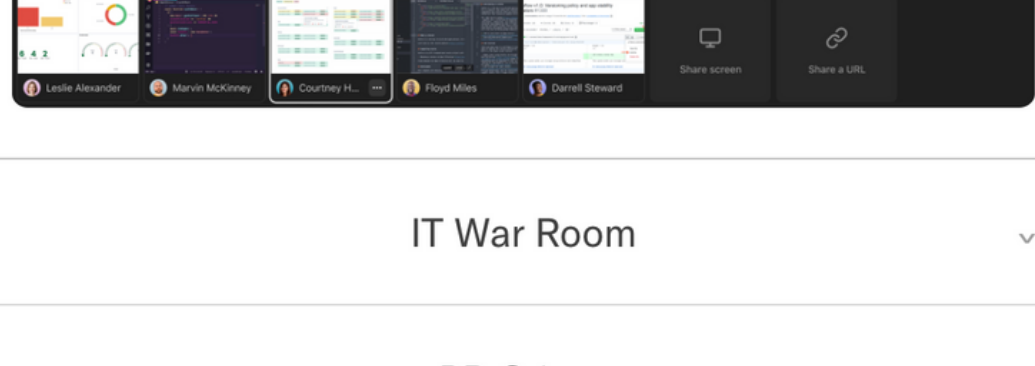

Perfect for all kinds of command centers

Event Management

Event Management

Rely on multiple simultaneous screen sharing to improve your response times and stay aligned across various channels.

Project Command Center

Make better decisions, faster

Using the digital whiteboard and multiple screen share tools simultaneously in a call gives everyone a voice in critical decision-making and allows us to collectively make better decisions, faster.

— Amy, COO

Like tackling challenges in person

Frameable Core's tools have been a great addition to our virtual command center giving us the ability to feel like we're tackling complex challenges in person

— William, IT Manager
