Benefits

Start leading more interactive and impactful training and onboarding sessions today

The benefits and functionality you've been looking for in the platform you know best: Microsoft Teams.

Get started

More efficient learning sessions

Interactive learning sessions mean you can convey more information quickly so your team can get started as soon as possible.

Built for instructor-led training

See right away where people are getting stuck, and turn those frustrations into learning moments for the whole group.

Effortless Teams integration

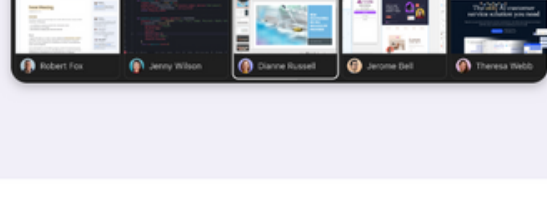

Our solutions work seamlessly in Microsoft Teams, removing friction and enhancing group collaboration.

Features

Comprehensive tools for a smoother onboarding and training process

Attendees can all share their screens

Instructors can see all of their attendees' screens so they can keep an eye on progress and know where people are getting stuck.

Instructor controls what the group sees

Facilitators can choose which screen to spotlight for the group at any time -- whether their screen or an attendee's screen.

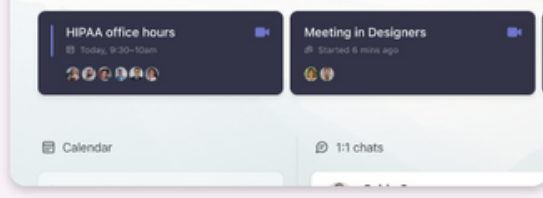

Collaborative whiteboard exercises

Get everyone to participate and work together in a shared real-time visual collaboration environment.

Open-door office hours

Trainers can make themselves available for those important ad-hoc individual and small-group interactions after the session.

Use cases

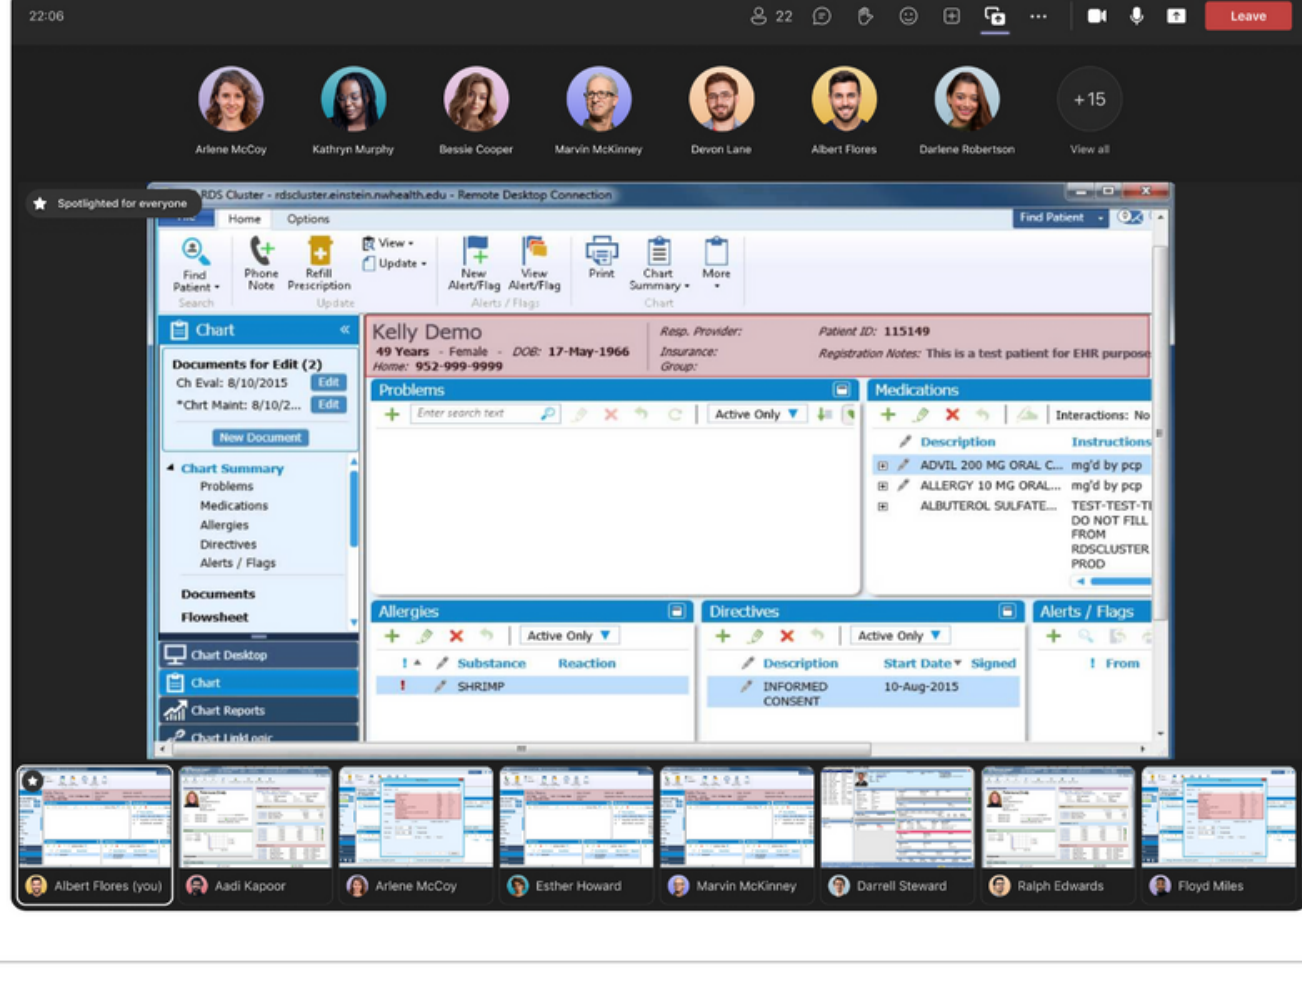

Perfect for all kinds of training

Software and application training

Software and application training

Instructors can train groups on new software or applications. Attendees can share their screens and instructors can assist as needed.

“

More engagement

We've seen a remarkable increase in participation and collaboration, making our training sessions more effective than they were before.

— Emily, HR Manager

“

Now we do our trainings in Teams!

Such an improvement from how we ran our trainings before with multiple different tools cobbled together. Now we have everything we need, right inside of Microsoft Teams.

— Michael, IT Leader
