FTS Automotive Solution

A solution for companies in the field of sales and servicing of machinery and equipment.

[BOOK A DEMO](#)

Short Overview

FTS Automotive Solution is an integrated business management solution for companies in the field of sales and servicing of machinery and equipment.

With the IT solution you reduce the cost of storing spare parts and materials by optimizing warehouse operations, control costs and improve relationships with customers.

Benefits

Transparency of processes

Costs are controlled.

Working with customers

Improve customer relationships by providing up-to-date service contract information.

Cost optimization

Reduce the cost of storing spare parts and materials by optimizing warehouse operations and orders to vendors.

Improved reporting

Job reporting of mechanics on each repair; compare actual service time and typical service time set by the manufacturer.

Features

Handling contracts

Maintain service contracts and track warranties.

Time entry

Enter operating time rates of machinery.

Reporting of service activities

Labor and materials input in an activity.

Increasing efficiency

Improved process traceability.

Improved traceability

Track purchasing, storage and spare parts issuance processes.
