MERIDIAN

HOW MERIDIAN EDMS CAN HELP EVERY DEPARTMENT IN YOUR ORGANIZATION

Meridian is a powerful engineering document management system (EDMS) that can:

- Help your engineering, construction, maintenance and IT teams talk effectively to one another

- Provide your organization with trackable and reportable data that you can use to maximize efficiency, minimize downtime and decrease costs

- Arm you with the information you need to overcome your real manufacturing challenges

- Break down crippling information silos

- Help you increase overall asset uptime

ACCRUENT

IT CAN ALSO HELP EACH DEPARTMENT IN YOUR ORGANIZATION TO GET THE JOB DONE. HERE'S HOW.

ENGINEERING

- Simplify management of technical documents like CAD drawings, facility documentation, technical manuals and engineering docs
- Streamline ongoing compliance and simplify audits
- Effectively allocate resources and manage department resources so you can finish work ahead of time and within budget
- Simplify enterprise-wide collaboration and get the funding you need for capital projects
- Effectively coordinate production, operations, quality assurance, testing and maintenance in your Industrial plant
- Make document versioning and maintaining engineering standards a breeze

MAINTENANCE & OPERATIONS

- Integrate with your CMMS system for organization-wide transparency

- Access the latest, most up-to-date engineering information and easily document, submit and initiate engineering changes to your as-built environment

- Create an effective maintenance budget and control operation costs

- Find the documentation you need to streamline work order package preparation and work order execution while minimizing costs and errors

- Close the loop with your engineering department

RELATED ASSETS

- Turbocharge Your CMMS With Meridian

IT

- Maintain security compliance and network security

- Decrease resolution time, time to response and time to close

- Simplify digital transformation, eliminate siloes, and more

- Maximize deliverability, software uptime and software performance

- Mitigate risk, and streamline compliance with revision controls, tracking and more

- Manage your technology load and ensure continuous uptime

- Simplify your digital footprint with browser-based access
