# Fujitsu
Establishing a Power Platform Centre of Excellence

FUJITSU

Microsoft's Power Platform offers organisations the opportunity to innovate and improve their applications and deliver organisational value. Modernise your Application Landscape, Improve business processes and take action based on Intelligent Insights while at same time providing standards, consistency and governance to your organisation.

What is a Power Platform CoE?

Fujitsu's Power Platform Centre of Excellence (CoE) solution offers a holistic approach to help your organisation leverage the low-code, no-code capabilities of Microsoft's Power Platform (Power Apps, Power Automate, Power BI and Power Virtual Agents) to transform, modernise and digitise your applications estate and business processes. Using Fujitsu's mature CoE approach will enable your organisation to innovate and transform with agility, to reduce cost and improve your employee and customer experience, whilst facilitating greater insights and automation.

What is Fujitsu going to do?

Fujitsu's Power Platform CoE will help your organisation drive continuous innovation and improvement; embracing a set of extensible low-code, no-code technologies and a community of like-minded individuals and business units with similar business goals to deliver value for your organisation.

Fujitsu's Power Platform CoE comprises of 5 key components:
- Power Platform Insights Centre
- Enable and Evangelism
- Advisory & Best Practice
- Data Platform Protection Guidance and Implementation
- Solutions Development and Managed Services via Fujitsu Fusion Teams

What's Included

Week 1: Power Platform Insights Centre
Install, Configure the Microsoft Power Platform Insights Centre toolkit. This establishes a baseline model and set of KPIs that the CoE can establish itself upon.

Week 2: Enablement and Evangelism
Fujitsu will deliver a series of workshops that enable the customer CoE with a deeper understand of the platform. This will include In-a-day sessions for Power Apps and Power BI. Fujitsu will also work closure with the customer CoE to establish a Power Platform community with Power Champions.

Week 3: Advise & Set up best practice guardrails
Fujitsu will work closely with the customers CoE to design and implement a set of best practices. These include Application Lifecycle Management Processes, Knowledge base development, Template libraries and How to Guides.

Week 4: Data Platform Protection
The most important part of the Power Platform CoE establishment. During this phase Fujitsu will establish the environment management process and the appropriate security layers. Governance and DLP policies will be implemented to ensure quality control is maintained.

Future: Fujitsu Fusion Teams
Fujitsu' Fusion teams are multi-skilled delivery teams that are formed to deliver against a defined backlog. Fujitsu's fusion teams can be augmented into a customer's current CoE team or can act as a delivery supplier taking work orders upon request.

Shaping tomorrow with you

FUJITSU
