

Extend & Innovate

Enterprise applications on Microsoft Power Platform

Streamline, connect, innovate your enterprise business.

Cloud adoption and no-code/low-code platforms are transforming enterprises. While ERPs reliably manage core functions like finance and HR, their **limited customization** and **high upgrade costs** hinder support for diverse, end-to-end workflows. This shift emphasizes the need for more flexible, adaptable solutions

Fujitsu empowers organizations to break free of existing core enterprise system or Line of Business (LoB) constraints & create efficient, consolidated, user-friendly experiences for staff, customers and partners. We allow customers to start transforming their enterprise data via Microsoft Power Platform & Microsoft Azure Services to experience the benefits of rich capabilities of a fully integrated digital ecosystem.

Consulting for envisioning & ideation

Understand aspirations, challenges, market landscape, foster buy-in among sponsors. Outcome is a clear future state with shared understanding and a high-level roadmap to guide subsequent strategic planning and implementation efforts

Deep dive, build test and deploy

Rapidly build ERP connected apps, integrated with Teams, Outlook. Automate processes, deploy bots spanning ERP & other systems. Enrich your ERP with extended processes and related operational data via digital innovation platform while transforming ERP processes by harnessing AI.

Empower business via knowledge and training

Effective knowledge transfer with insights and operational expertise disseminated across your teams, fostering self-sufficiency and reducing reliance on specialized roles while adapting to evolving technologies and improving overall organizational agility..

Seamlessly manage & operate landscape

Leverage Fujitsu intelligent application managed services to operate and manage the live environments – 24x7.
