

Modern Security Operations Engagement

After the Modern SecOps Engagement, you will...

- ✓ Understand the benefits of a cloud native Unified SecOps Platform
- ✓ Better understand, prioritize, and mitigate potential threats
- ✓ Have the ability to rapidly adopt Microsoft Sentinel to compliment existing investment in Microsoft security tools with Fujitsu Managed Security services
- ✓ Have defined next steps based on your needs and objectives

Our Modern Security Operations Engagement is designed to show how intelligent security analytics and threat intelligence can detect and quickly stop active threats. This engagement will help you understand the value of deploying and adopting our Modern SecOps solution.

Key Benefits and Solutions:

- **Showcasing Modern SecOps Experience:** Gain a hands-on understanding of our advanced security operations platform.
- **Identifying Active Threats:** Detect threats across identity, email, and data in both on-premises and cloud environments.
- **Automated Threat Response:** Experience our automated systems that swiftly respond to and neutralize threats.
- **Actionable Recommendations:** Receive expert guidance on next steps for a seamless production deployment of Modern SecOps.

By participating in this engagement, you will enhance your organization's threat triage and investigation capabilities, leading to a more efficient and secure environment.

This workshop will help you understand how **Microsoft Sentinel** and **Defender XDR** security products and Fujitsu Security services can help you mitigate and protect against the threats. With these you get the information required for you to build a **business case for a production deployment of Microsoft Sentinel**.
