Alithya

RapidQA

The only tool that allows you to create automated tests without requiring technical expertise.
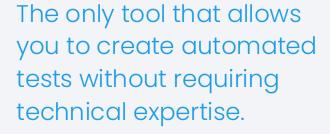

/ Test automation is the way to improve software quality and reduce costs incurred to fix errors.

/ Bolstering repeat testing is a simple measure to cut down on software errors.

RapidQA is the only platform that lets you perform true end-to-end testing without extensive technical knowledge.

Get top-quality services with RapidQA:

/ RapidQA implementation accelerator
/ Experienced automation specialists
/ Specialized or customized training
/ Support
/ Managed services (QaaS)
/ A practice with over 100 QA specialists

Problems solved

/ Improved software quality
/ Fewer bugs
/ Reduced delivery times and costs
/ Reliable, high-performance software

Key benefits

/ One centralized place for your manual and automated tests
/ Test documentation is integrated into RapidQA
/ Run centralized hybrid tests on the same platform (combination of automated and manual tests)
/ No extensive technical knowledge required
/ Unlimited keyword automation
/ End-to-end tests with many different software integrations
/ Test your ERPs, as well as web, SaaS, mobile (Android and iOS) and/or local applications on the same platform
/ Integrate RapîdQA into your pipelines via its public API
/ Oracle Fusion test suite
/ Dynamics test suite
/ Bilingual (English and French)

RapidQA features

1. Documentation (test plans & scenarios)

The simplicity of the tool lies in its powerful keyword-driven testing functionalities that facilitate and accelerate the creation of scripts for test automation, whether you are a seasoned quality assurance specialist or only have basic technical skills.

With these features and the intuitive interface, you can check the quality of your applications throughout the system's development cycle.

Because the platform can integrate other testing tools of your choice, RapidQA can test all technologies and programming languages at once, giving you a complete overview of the results and the status of your application and identifying the exact source of your errors.

The Alithya difference

Our trusted digital strategy and transformation consultants have been combining technological expertise with a client-centred approach for more than 30 years. We are transforming the world one digital step at a time backed by our expertise and collective intelligence to develop practical and customized IT solutions that address our clients' complex challenges.
